

Creating Web Apps with JBoss AS 7 on OpenShift

Pete Muir

Principal Software Engineer, JBoss

May 2012

@plmuir

SESSION OBJECTIVE

In this session we'll build an application, using MySQL, from scratch, deploy it to the cloud, add Arquillian for testing and add Jenkins for continuous integration. All in 45 minutes.

OpenShift

Red Hat's *Platform as a Service* offering.

The best way to **develop** and **host** your application in the cloud, the way you like it. **No lock-in**, based on **open source** and your **language of choice**.

JBoss AS 7

1. Blazing fast start-up time
2. Application Runtime (including Java EE 6)
3. Lightweight memory footprint
4. Modular core
5. Elegant management
6. Built in domain management
7. Testable by design

Demo

Pete Muir

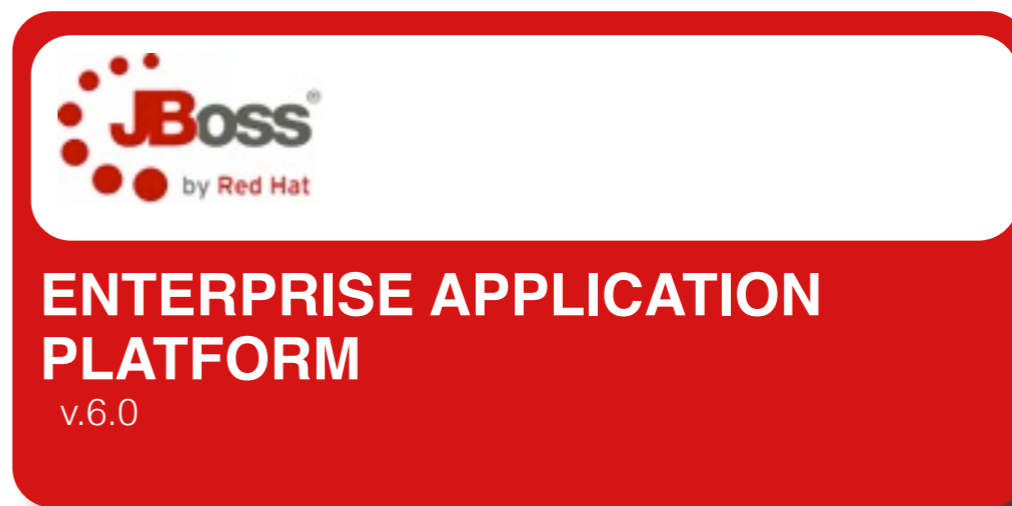

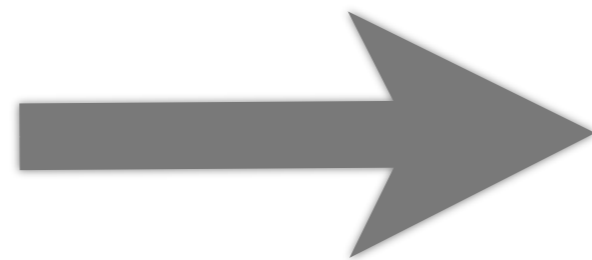

Can I get support?

JBoss AS 7.1
