Our bespoke training will be relevant to your application.

- We can update your knowledge on current technologies and innovations.
- Receive ‘Quick Reference’ sheets and short-cuts that ‘unlock’ the instruction manual.
- Receive clear explanations of menu structures.
- Learn good working practice eg. Health and Safety considerations - Your do’s and don’ts!
- Understand product capabilities.
- Have technical terms explained.
- Customise product settings to suit your application.
- Your training will be exercise-led in a relaxed atmosphere.

The objective...

- Increased user confidence
- Increased product utilisation
- Increased return on investment

"PS. You don’t need to have purchased the product from us!"

This training is intended for those with a basic knowledge of the subject; for absolute beginners see our subject-based Awareness courses.

Training matters...

A lack of product training can result in under-utilisation of test equipment, low return on investment and, most importantly, incorrect use.

Do you have a feeling that you are using only 20% of the features your product has to offer?

Do you need a refresher course? Have your trained personnel moved on? Or simply lost the instruction manual?!

“We are able to offer a range of product training modules to suit YOU!”

Product Awareness

Including Product and Software Training

Full day and half day courses

At a location to suit YOU!
