

- Allows easy, safety connection to light fittings
- The fastest way to check insulation/continuity/loop/polarity
- High quality low Ohm 4mm connectors
- Allows the light fitting to remain in place
- No broken connections as a result of testing
- Safer and saves time
- Allows hands free testing
- Adaptors for most commonly found light fittings
- Includes test leads

Description

The Socket & See LTKIT10 is designed to enable easy, safe connection to light fittings for testing insulation, continuity, loop and polarity.

The kit comprises of a range of adaptors to fit...

Bayonet
Small Bayonet
GU10
Edison Screw
Small Edison Screw

The adaptors allows testing without the need to remove the light fitting which helps prevent possible broken connections or damage to decoration surrounding the fitting. They also allow for hands free testing.

A 120cm 4mm lead set is also included for easy connection to your tester. Everything included comes in a soft pouch.
