

UNIVERSAL LEAD SET for MTO, TTRU3, MWA and TRAX

The 3Ø Universal lead set simplifies connecting to any transformer. The durable kelvin clamps extend up to 76 mm / 3" for connecting to any bushing size. Lead spans range from 5m (15ft) to 30m (100ft), ensuring you can connect and test any transformer configuration. All of the leads can be connected in one ladder climb, reducing the risk of fall injuries, and color-coded lead jackets and clamps make it

easy to verify proper connections with your feet safely on the ground. The kelvin clamps also accept safety banana plugs, making it easy to connect the 3Ø lead set to a CT terminal block. Electrical shock and potential markings are clearly displayed on the clamp, informing operators how to connect safely and securely. The universal lead set can be used with TTRU3, MWAs, and most existing MTOs and TTRs.
