

DIGITAL LEADERS

Hambrook Digital Leaders are passionate about computing and online safety.

Together they have many responsibilities.

Digital Leaders:

- Promote safe use of internet resources through the school by knowing the SMART rules
- Present e-safety presentations to the school during computing week
- Manage iPad and laptop hardware
- Assist students and members of staff to use new programming software.
- Are the first to try out new apps and software on iPads and laptops

As well as a Friday project group, the Digital Leaders educate and support younger students, helping them to use new software safely online.

They have also learned how to set up Programming accounts which they use safely at school and at home.
