Hambrook Primary School Sports Premium Funding Provision 2017/18

March 2018 Update

Physical Education Rationale

At Hambrook Primary School, we believe in the development of sport and physical activity for all pupils so that participation and achievement levels can continue to rise. We have liaised with staff and children, encouraging collaboration and partnership, to make the best use of resources to enhance PE and sport provision throughout Hambrook. We believe it is important for children to experience participation in a wide range of team sports and be successful in a range of sporting disciplines.

This plan aims to structure raising standards of teaching throughout the school and support further opportunities for all pupils in a range of physical activity, both during the school day and out of school hours.

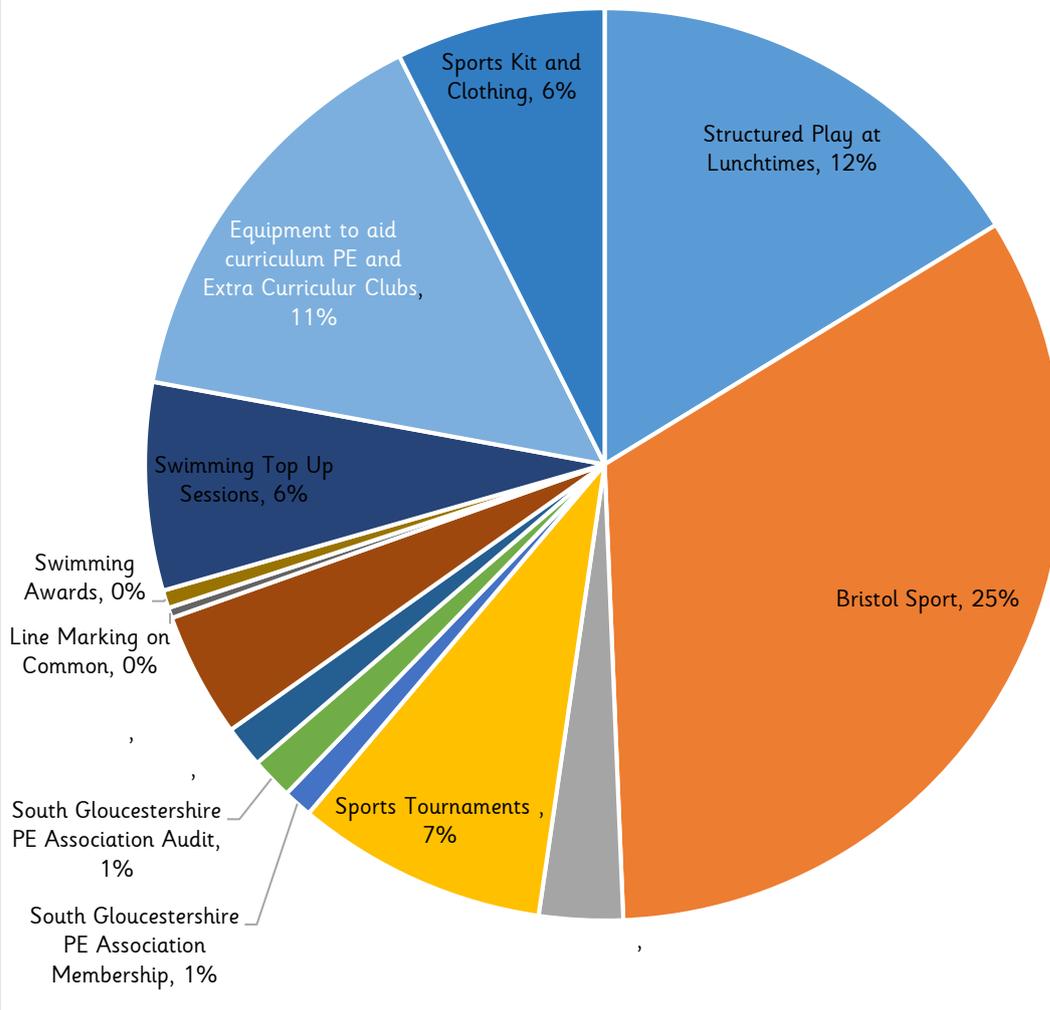

Our aims for this academic year have been based on the following criteria:

1. Increase the confidence of staff teaching PE through CPD alongside delivery of curriculum PE
2. Provide a wider variety of curriculum PE lessons for all pupils
3. Continue to improve the facilities, equipment and resources for teachers to deliver outstanding PE lessons and enhance current play provision
4. Increase awareness of healthy eating and invest in a scheme of work together with resources for each year to complete

How have we spent the Sports Premium funding?

Careful planning has been carried out to ensure the sports premium funding is used to enhance the current provision for physical education. We have taken into consideration the guidelines set out by the government, WESPORT and the Youth Sport Trust to ensure our funding is spent appropriately and effectively.

Hambrook Primary School Overview of Sports Premium Spending

What has been the impact so far?

At the half way point through this academic year, the impact of our investment is clear. Teachers from all but 1 year group have had access to a Bristol Sport led teaching sequence which has dramatically improved confidence and understanding of a range of sports. These include gymnastics, multi skills and cricket. Teachers have expressed their positive feedback at the high calibre of coaching and teaching this year.

Money is also being invested into creating a cookery room for the school which will allow each class to focus on a healthy eating topic for a 6 week block. This will be up and running in Spring Term 2.

Further investments are being made to improve the facilities at Hambrook and provide teachers with the necessary equipment to deliver high quality PE lessons.
