Dear Parents

As you are aware, Wilton Primary has been a founding member of the Aspire Learning Partnership since September 2014. Within this structure, staff and children have benefitted from many additional opportunities and experiences. The Governors believe partnership and collaboration are important and central to the success of Wilton Primary School.

There are an increasing number of schools throughout Redcar & Cleveland and from within the Aspire Learning Partnership who are choosing to become academies and some will be joining successful multi academy trusts (MAT).

I wish to inform you that the Governing Body recently passed a resolution to convert to an Academy and explore joining an established multi academy trust (MAT) in the local area during 2018. As a small school, the option to join a larger structure will provide opportunities for financial efficiencies, sharing of resources and the provision of additional experiences and curriculum opportunities that we would not be able to provide on our own.

The Governors and the senior leadership of Wilton Primary will be undertaking actions this term to move towards academy conversion. Consultation with parents is part of this process and information will be sent out in due course. Formal consultation will start early in the summer term and this process will give you the opportunity to find out further information, express your views and raise any questions you may have.

This is an exciting and positive step for Wilton Primary; working within a wider partnership will make our school even stronger and most importantly further help all our children to become the best they can be during their primary education.

Yours sincerely
Mrs Hill
