

Science: Task 1

Why should we wash our hands? Reading Comprehension

Washing your hands is very important because it's the best way to stop germs from spreading. If everyone washed their hands, fewer people would become sick. Germs spread by touching dirty hands or changing dirty nappies. Touching dirty water can also mean you are spreading germs so washing your hands with warm water and soap is the best way to stop germs from spreading.

	True	False
