30.6.21 Can I use past tense verbs?

Rewrite this in the past tense, starting Yesterday rather than Today.

Today I am working at home. I learn to spell some words and I write them down. Then I count back from different numbers. It is a bit tricky. I make a clock and I put the numbers in the right places. A grown up says times for me too. At lunch time I run around in the garden. I shout and sing and jump as well! I open a new document on the computer and I type some words. After that I play because I have finished.
