

# ToodleBit

A background image showing three diverse students in school uniforms. They are smiling and holding up their Micro:Bit boards, which are small black circuit boards with various components and colored wires (red, blue, green) attached. The boards are held up in front of their faces, partially obscuring them.

School closed? Not a problem, ToodleBit can now be accessed from home. Visit [www.home.toodlebit.com](http://www.home.toodlebit.com) and create your own free account.

Many activities can be completed using only the MakeCode simulator and without a Micro:Bit.
