8th January 2020

Dear Parents/Carers

Information regarding increasing your mobile data allowance

The government has set up a Get Help with Technology scheme to support parents to access home learning during this current period. Unfortunately, they have not released any laptops to primary schools yet. They have only been allocated to secondary schools.

However, as part of this scheme, parents can increase the data allowances on their mobile devices to support children accessing their home learning. Please follow the link below to read further information about this and to see if you meet the criteria to apply. Unfortunately, you cannot apply for this yourself. It needs to be sent through the school. If you feel that you meet the criteria and this would benefit your child in their learning, please email the school secretary at secretary@pensilva.cornwall.sch.uk with the following information:

- The name of the account holder;
- The number of the mobile device;
- The mobile network of that device (e.g. EE);
- Whether you pay monthly or pay as you go.
