

Year 7 Literacy & Numeracy Catch-up Premium Progress 2017-2018

The current Year 7 grant is being used to support pupil's progress in literacy and numeracy by further developing the use of Positive Behaviour support to increase levels of engagement, reduce levels of anxiety and allowed greater access to learning. It supports independent learning and pupil led learning as students manage to regulate their behaviours.

Additionally, the development of 'financial education' will help develop functional and meaningful use of money and number. The maths lead will be applying to become a 'centre of excellence' in FE as it is very supportive for pupils with SEN.

Pupils are taught individually and in small groups and all have Communication Plans written by the SALT team and in addition have weekly group sessions with the therapists.

Progress meetings are held twice a year to check if pupils are meeting their targets and action is taken where necessary.
