

7.1.21 Forest school-

If we were in school our Forest School lesson would link to our story focus this week. Our story is the Three Little Pigs. If possible, today's activity is to find natural materials to use to create your own small house. If you can't get out to use natural materials anything that is available such as a cereal box would be a good alternative.

Create your own house using a range of materials.

Please send any photos of your creations you wish to show me to the reception email address:
