

## Green Class

18.01.19

This week Green Class have enjoyed a visit to the Discovery Museum where we got to see a really big shield that Vikings used! We also saw a long boat and got to go into the Science Room in the afternoon . We got to make really big shadows and play air hockey.

In cookery this week we have been making soup with lots of vegetables and learning about what the Vikings used to eat. In art we have been making some fantastic Mosaic Pots which are now up on our amazing display in the classroom.

In Literacy we have been finding out more things about our book and discussing a lot about the characters and settings. For our big write on Friday we have been writing what the Vikings must have been thinking and saying by looking at a few pictures from the book. Everyone cannot wait to read it next week and find out if our predications are correct!

In Maths this week we have been learning about fractions and finding the equivalent. We have worked really hard with different hands on activities such as musical fractions using coloured water and glasses.

In Forest school we have been sowing our seeds in the class into pots. We have learned what plants need to grow. We are planting tomato's, lavender and Rosemary!

### UPDATE:-

- Swimming on Thursday afternoon
- Visit to the Hancock Museum on Tuesday.
- Homework Booklet about fractions to work through this half term. To hand 2 pages in every Friday out of the booklet.
