

# FRUIT PLANT GROWING SEQUENCE

The pictures and instructions are all jumbled up. Your task is to order them correctly to show the sequence of how to grow a fruit plant.

Fruit then grows on the plant.

Plant the seeds into the soil.

The plant grows and begins to flower.

Using a watering can, water the seeds.

The seeds begin to sprout and grow.

Fill the plant pot with soil.

You could use the flow diagram below or write it in your jotter.
