

Supporting Pupils with Medical Conditions Policy

At St. Joseph's we aim to
promote a learning community
based on the Gospel values of
Love, Trust and Respect
where the achievements of everyone
are recognised and celebrated

Living, Learning and Loving
together with Christ

Aims

This policy aims to ensure that:

- Pupils, staff and parents understand how our school will support pupils with medical conditions
- Pupils with medical conditions are properly supported to allow them to access the same education as other pupils, including school visits and sporting activities

The governing body/headteacher will implement this policy by:

- Making sure sufficient staff are suitably trained
- Making staff aware of pupil's condition, where appropriate
- Making sure there are cover arrangements to ensure someone is always available to support pupils with medical conditions
- Providing supply teachers with appropriate information about the policy and relevant pupils
- Developing and monitoring individual healthcare plans (IHPs)

The named person with responsibility for implementing this policy is Miss E Mathews.

Legislation and statutory responsibilities

This policy meets the requirements under Section 100 of the Children and Families Act 2014. It is also based on the Department for Education's statutory guidance: Supporting pupils at school with medical conditions.

Section 100 of the Children and Families Act 2014 places a duty on governing bodies of maintained schools, proprietors of academies and management committees of PRUs to make arrangements for supporting pupils at their school with medical conditions.

Roles and responsibilities

The governing body

The governing body has ultimate responsibility to make arrangements to support pupils with medical conditions. The governing body will ensure that sufficient staff have received suitable training and are competent before they are responsible for supporting children with medical conditions.

The headteacher

The headteacher will:

- Make sure staff are aware of this policy and understand their role in its implementation
- Ensure that there is sufficient number of trained staff available to implement this policy and deliver against all individual healthcare plans (IHPs), including in contingency and emergency situations
- Take overall responsibility for the development of IHPs
- Make sure that school staff are appropriately insured and aware that they are insured to support pupils in this way
- Contact School Health in the case of any pupil who has a medical condition that may require support at school, but who has not yet been brought to the attention of School Health

- Ensure that systems are in place for obtaining information about a child's medical needs and that this information is kept up to date

Staff

Supporting pupils with medical conditions during school hours is not the sole responsibility of one person. Any member of staff may be asked to provide support to pupils with medical conditions, although they will not be required to do so. This includes the administration of medicines.

Those staff who take on the responsibility to support pupils with medical conditions will receive sufficient and suitable training, and will achieve the necessary level of competency before doing so.

Teachers will take into account the needs of pupils with medical conditions that they teach. All staff will know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

Parents

Parents will:

- Provide the school with sufficient and up-to-date information about their child's medical needs
- Be involved in the development and review of their child's IHP and may be involved in its drafting
- Carry out any action they have agreed to as part of the implementation of the IHP e.g. provide medicines and equipment.

Pupils

Older pupils with medical conditions will often be best placed to provide information about how their condition affects them. Where age appropriate, pupils should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of their IHPs. Children should be encouraged to comply with their IHPs.

School health and other healthcare professionals

Newcastle School Health Service will notify the school when a pupil has been identified as having a medical condition that will require support in school. This will be before the pupil starts school wherever possible.

Healthcare professionals, such as GPs and paediatricians, will liaise with the school nurse and notify them of any pupils identified as having a medical condition.

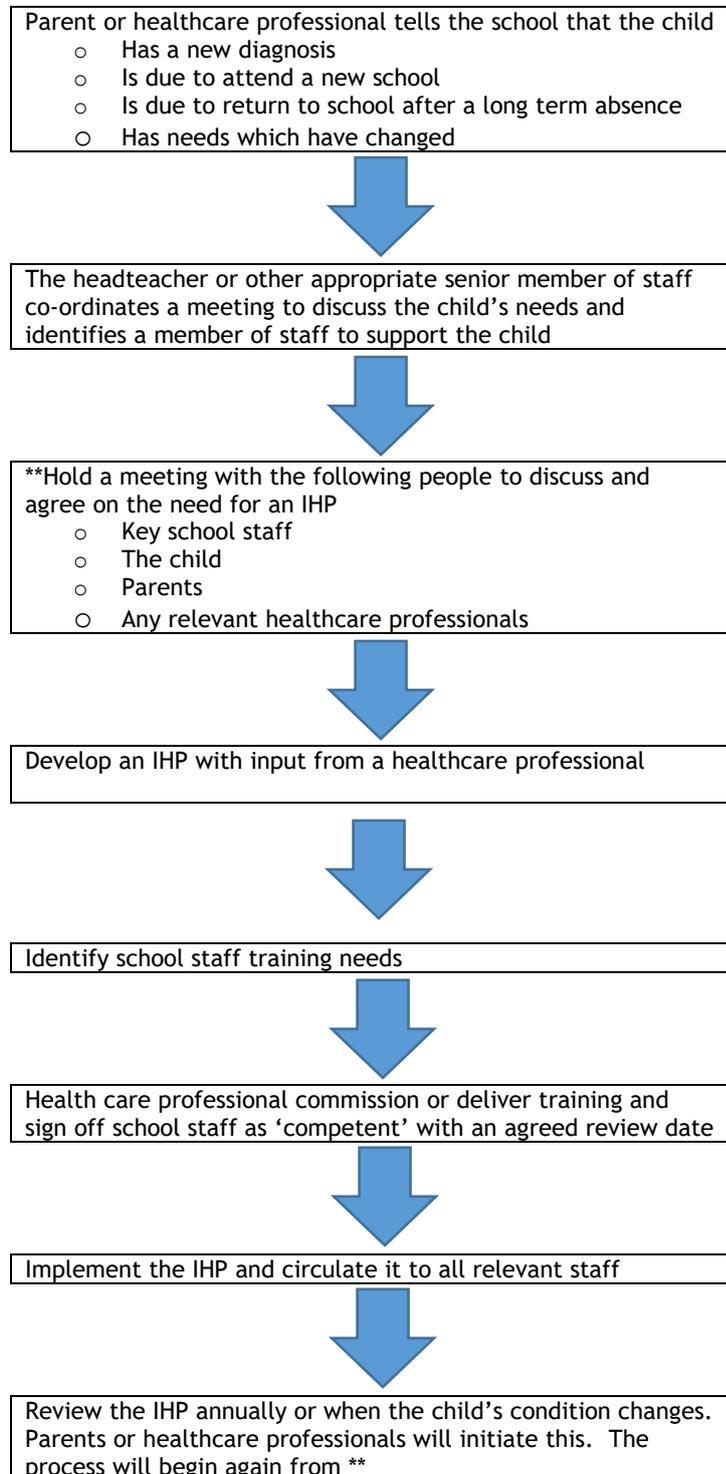

Equal opportunities

Our school is clear about the need to actively support pupils with medical conditions to participate in school visits and sporting events and not prevent them from doing so.

The school will consider what reasonable adjustments need to be made to enable these pupils to participate fully and safely on school visits and sporting activities. Risk assessments will be carried out so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included. In doing so, their parents and any healthcare professionals will be consulted.

Being notified that a child has a medical condition

When the school is notified that a pupil has a medical condition, the process outlined below will be followed to decide whether the pupil requires an IHP. The school will make every effort to ensure that arrangements are put in place within 2 weeks, or the beginning of the relevant term for pupils who are new to our school.

Individual healthcare plans

The headteacher has overall responsibility for the development of IHPs for pupils with medical conditions. This has been delegated to Mrs H Love, SENCo. Plans will be reviewed at least annually or earlier if there is evidence that the pupil's needs have changed.

Plans will be developed with the pupil's best interests in mind and will set out

- ✓ What needs to be done
- ✓ When
- ✓ By whom

Not all pupils with a medical condition will require an IHP. It will be agreed with a healthcare professional and the parents when an IHP would be inappropriate or disproportionate. This will be based on evidence. If there is not a consensus, the headteacher will make the final decision.

Plans will be drawn up in partnership with the school, parents and a relevant healthcare professional such as the school nurse, specialist or paediatrician, who can best advise on the pupil's specific needs. The pupil will be involved wherever appropriate.

IHPs will be linked to, or become part of, any statement of special educational needs (SEN) or education, health and care (EHC) plan. If a pupil has SEN but does not have a statement or EHC plan, the SEN will be mentioned in the IHP.

The level of detail in the plan will depend on the complexity of the child's condition and how much support is needed. The following points will be considered when deciding what information to record on an IHP:

- The medical condition, its triggers, signs, symptoms and treatments
- The pupil's resulting needs, including medication (dose, side effects, and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors, travel time between lessons
- Specific support for the pupil's educational, social and emotional needs. For example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions
- The level of support needed, including in emergencies. If a pupil is self-managing their medication, this will be clearly stated with appropriate arrangements for monitoring
- Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional, and cover arrangements for when they are unavailable
- Who in the school needs to be aware of the pupil's condition and the support required

- Arrangements for written permission from parents and the headteacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours
- Separate arrangements or procedures required for school visits or other school activities outside of the normal school timetable that will ensure the pupil can participate, e.g. risk assessments
- Where confidentiality issues are raised by the parent/pupil, the designated individuals to be entrusted with information about the pupil's condition
- What to do in an emergency, including who to contact, and contingency arrangements

Managing Medicines (see also Managing Medicines In School policy)

Prescription medicines will only be administered at school:

- When it would be detrimental to the pupil's health or school attendance not to do so **and**
- Where we have parents' written consent

Anyone giving a pupil any medication (for example, for pain relief) will first check maximum dosages and when the previous dosage was taken. Parents will also be informed.

The school will only accept prescribed medicines that are:

- In-date
- Labelled
- Provided in the original container, as dispensed by the pharmacist, and include instructions for administration, dosage and storage

The school will accept insulin that is inside an insulin pen or pump rather than its original container, but it must be in date.

All medicines will be stored safely in first aid areas. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available and not locked away.

Medicines will be returned to parents to arrange for safe disposal when no longer required or out of date.

Unacceptable practice

School staff should use their discretion and judge each case individually with reference to the pupil's IHP, but it is generally not acceptable to:

- Prevent pupils from easily accessing their inhalers and medication, and administering their medication when and where necessary
- Assume that every pupil with the same condition requires the same treatment
- Ignore the views of the pupil or their parents
- Ignore medical evidence or opinion (although this may be challenged)
- Send pupils with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal school activities, including lunch, unless this is specified in their IHPs

- If the pupil becomes ill, send them to the school office or for first aid unaccompanied or with someone unsuitable
- Prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical conditions effectively
- Require parents, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their child, including with toileting issues. No parent should have to give up working because the school is failing to support their child's medical needs
- Prevent pupils from participating, or create unnecessary barriers to pupils participating in any aspect of school life, including school visits e.g. by requiring parents to accompany their child
- Administer, or ask pupils to administer, medicine in school toilets.

Emergency Procedures

Staff will follow the school's normal emergency procedures (for example, calling 999). All pupils' IHPs will clearly set out what constitutes an emergency and explain what to do.

If a pupil needs to be taken to hospital, staff will stay with the pupil until the parent arrives, or accompany the pupil to hospital by ambulance.

Training

Staff who are responsible for supporting pupils with medical needs will receive suitable and sufficient training to do so.

The training will be identified during the development or review of IHPs. Staff who provide support to pupils with medical conditions will be included in meetings where this is discussed.

The relevant healthcare professionals will lead on identifying the type and level of training required and will agree this with the headteacher. Training will be kept up to date.

Training will:

- Be sufficient to ensure that staff are competent and have confidence in their ability to support the pupils
- Fulfil the requirements in the IHP
- Help staff to have an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative measures

Healthcare professionals will provide confirmation of the proficiency of staff in a medical procedure, or in providing medication.

All staff will receive training so that they are aware of this policy and understand their role in implementing it, for example, with preventative and emergency measures so that they can recognise and act quickly when a problem occurs. This will be provided for new staff during their induction.

Record Keeping

The governing body / headteacher will ensure that written records are kept of all medicine administered to pupils. Parents will be informed if their child has been unwell at school.

IHPs are kept in a readily accessible place which all staff are aware of.

Liability and indemnity

The governing body will ensure that the appropriate level of insurance is in place and appropriately reflects the school's level of risk.

(Certificate of Employers Liability Insurance, Zurich Minicipal, Policy Number KSC - 272039 - 2953) Attached

Complaints

Parents with a complaint about their own child's medical condition should discuss this directly with the headteacher in the first instance. If the headteacher cannot resolve the matter, parents will be directed to the school's complaints procedure.

Monitoring arrangements

This policy will be reviewed and approved by the governing body every two years.
