

# COVID Control Plan:

## Education settings

**CORONAVIRUS**  
**PROTECT YOURSELF & OTHERS**

### Possible case of COVID-19

If a child/student or staff member develops a new continuous cough, or high temperature, or change to sense of taste and/or smell they should:

Go home/be collected and follow NHS guidance on self-isolation and accessing testing. All this is available at [www.nhs.uk/coronavirus](http://www.nhs.uk/coronavirus)

Child should be isolated while awaiting collection. PPE should be worn by staff caring for symptomatic children. Staff member caring should self-isolate if they develop symptoms or child tests positive.

You must also inform COVID Control team at Newcastle City Council by filling in the online form at [bit.ly/3frSiue](https://bit.ly/3frSiue) (type this link into your internet browser. Link is case sensitive).

Inform Public Health England's local health protection team if they have not already contacted you. Call **0300 303 8596** and choose **option 1** from menu.

### Confirmed case COVID-19

If a child or staff member tests positive for COVID-19 they and everyone in their household should self isolate, as well contacts traced in the event of positive test.

All others in 'bubble' with confirmed case should go into self-isolation for 14 days. Their wider households don't need to unless symptoms develop.

**Continue to follow best hygiene practices at all times. Regularly wash hands or use hand sanitiser, avoid touching your face and maintain social-distancing with others.**

**For all the latest national guidance on PPE, self-isolating, social-distancing and the NHS Test and Trace system, visit [www.gov.uk/coronavirus](http://www.gov.uk/coronavirus)**
