

Brunton First School

Active School Travel Policy

At Brunton First School we encourage pupils and parents to travel to school by cycling, scooting and walking wherever possible. We aim to make sustainable and active travel easier for everyone.

We have a School Travel Working Group which is involved in encouraging our pupils to use leg power to get to and from school. They help organise and run associated events to encourage more pupils to walk, cycle or scoot to school.

This school travel policy explains how we encourage active travel to school. We discuss the policy with the pupils and will re-visit it yearly to ensure its relevance and effectiveness.

For pupils unable to come by foot or bike, we like to encourage use of the park and stride facility nearby.

We welcome any ideas to improve things at or around school for pedestrians and cyclists, or questions about travelling to school, please get in touch with the school.

Our School Travel

Champion is Mrs McKay the Head Teacher.

Some of the benefits of active travel:

- Improving both mental and physical health through physical activity
 - Establishing positive active travel behaviour
 - Promoting independence and improving safety awareness
 - Reducing congestion, noise and pollution in the community
 - Reducing the environmental impact of the journey to school.
-
- **To encourage pupils to cycle, scoot or walk to school frequently the school will:**
 - Actively promote cycling, scooting and walking as a positive way of travelling
 - Celebrate the achievements of those who cycle, scoot and walk to school
 - Provide cycle and scooter storage on the school site
 - Provide high quality cycle training to all pupils who wish to participate.
 - **To make cycling, scooting and walking to and from school a positive experience for everybody concerned, we expect our pupils to:**
 - Wear a cycle helmet
 - Ride and walk sensibly and safely and to follow the Highway Code and Green Cross Code using formal crossings such as the zebra crossing when available
 - Check that their bicycle or scooter is roadworthy and regularly maintained
 - Behave in a manner which shows them and the school in the best possible light and to consider the needs of others when cycling or scooting
 - Ensure they can be seen by other road users, by using lights and wearing high-visibility clothing, as appropriate.
 - **For the well-being of our pupils, we expect parents and carers to:**
 - Encourage their child to walk, cycle or scoot to school whenever possible
 - Encourage their child to take up opportunities to develop their competence and confidence in cycling or scooting
 - Consider cycling, scooting and walking with their child on the school run; possibly joining with other families as a 'cycle train'

- Provide their child with equipment such as high-visibility clothing, lights, a lock and **essentially** a cycle helmet as appropriate
- Ensure that the bicycles and scooters ridden to school are roadworthy and regularly maintained.
- Drive with care and consideration for other road users, particularly children.
- Stick to the speed limits and park with consideration for other road users and residents.

Please note: The decision as to whether a child is competent to cycle, scoot or walk safely to and from school rests with the parent(s)/carer(s). The school has no liability for any consequences of that decision. Parents are advised to take out appropriate insurance cover for bikes (check home insurance) as the school's insurance does not cover any loss or damage to bicycles and scooters.

Please read Appendix 1 to find out more about the benefits of active travel.

Walkit.com

How our children travel to school can be a hot topic for discussion. Commuters grumble about the increase in traffic during the hours of the “school run”. Residents living near schools can find their neighbourhoods choked with traffic and noise at the beginning and end of the school day. And parents are deeply concerned about the safety of their children, as well as getting them to school and themselves to work on time.

Why walk to school? There are many benefits. Here are just some of them:

Benefits for your children

1. Fitness and health

Most of us are very aware that childhood obesity is rising fast – in 2008, 31% of children between the ages of 2 and 15 were overweight or obese. As you’ll read in [Walking for Health](#), children need at least an hour of physical activity per day, and walking to school is a great way to get some of that exercise.

There are also concerns about the level of pollution that children are exposed to sitting inside cars in congested or slow moving traffic. When planning your walking journey to school, it may well be possible to find a route which is quiet or traffic-free, and walking through green spaces such as parks can make you feel calmer and happier.

2. Concentration at school

Evidence shows that children who are physically active on the way to school burn off some of their excess energy, and are more able to settle down and focus well in lessons.

3. Road safety skills

Good habits learned young are learned well. Teaching your child to walk safely to school will stand them in good stead for the rest of their life.

4. Socialising and independence

Whilst walking with parents your child can develop friendships with other children walking to school with their parents. If your child is old enough to walk to school with friends, they will have extra time in the day to build friendships, and feel comfortable around other people.

Benefits for you

1. Fitness and health

If you walk with your child to school, you will also get fitter! If your child is old enough to walk fairly fast, you’ll be adding to your daily total of physical activity. And because it’s much easier to predict how long walking will take you, your journey to school is likely to be much less stressful than being at the mercy of traffic.

2. Cost

This one’s easy... the amount you spend on fuel will go down!

3. Time

It may not be your first instinct, but walking to school might actually save you time. Here’s how: Firstly, it could be that walking to school doesn’t actually take you much longer than driving (when was the last time you timed each option?) If your child is older, and able to walk home by themselves or with friends, just think of all that time you won’t need to spend waiting for them to dawdle out of the school gates!

Benefits for the environment and community

During term-time, one in five cars on the road at the peak travel time of 8.45 a.m. are parents driving their children to school. By switching to walking, we can save huge amounts of CO₂, helping to prevent climate change, and reduce levels of air pollution which are a major cause of asthma.

For residents of local communities near schools, trying to get to work at this time can be a huge struggle, what with traffic congestion in small residential streets, and the general mayhem of parents parking up, dropping kids off and snatching quick conversations with friends at the school gate.

Making it easier and safer to walk to school

So there are huge benefits to walking to school, but of course it's not just a matter of making a simple switch from driving to walking. People have complicated lives, with children at different schools, jobs to get to, and other daily tasks to complete. Parents often have very real concerns about the safety of their children crossing roads, and 'stranger danger'.

Fortunately there is now much greater awareness of the need to make walking to school both easier and safer. A wide range of information is available, as well as many ideas and initiatives that have been tried and tested. Why not find out about some more about:

- School travel plans
- Road safety training
- Safe routes to school
- Park and Stride
- Walk to School Week, and Walk to School Month
- Hi-visibility clothing

The knack is to find the combination that works best for you and your family.
