

Thematic Planning

Monday

Do you remember learning last week about where we live? Yes, I know you live in a house on a street but I'm talking about this thing!

The planet that we live on! Do you know the name of this planet?

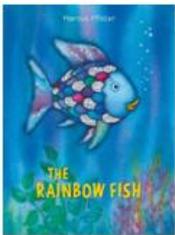

Can you remember if it is made of just land or does it have lots of water too?

That's a lot to remember so why not watch the clip again.

<https://www.youtube.com/watch?v=Wg-pFtvsymo>

Yes, it is made of land and water. In fact, there is more water than land!

That's good news for The Rainbow Fish and all his fish friends!

Tuesday

Yesterday we reminded ourselves about our home, planet Earth.

Even more exciting, did you know that the Earth is part of a group or family of planets called the solar system?

Do you want to know more? Would you like to travel into space? Ok, let's go and explore the solar system with this chap, Paxi!

Ready? 5, 4, 3, 2, 1 - blast off!

https://www.esa.int/kids/en/Multi-media/Paxi_animations/English/The_Solar_System

This adventure with Paxi is available in lots of different languages.

Wednesday

After yesterday's lesson, I think we all know a bit more about space and the planets in the solar system!

Today, let's come back down to Earth.

The main characters in The Rainbow Fish story are... fish!

So, first, let's find out about fish. This short video clip is perfect and packed with great information!

[Fabulous fish - KS1 Science - BBC Bitesize](#)

As The Rainbow Fish lives in the sea (a coral sea), I think we should learn about life under the sea. Here is a brilliant clip to watch. It is called 'small beginnings' and is all about coral seas and how just one tiny, tiny creature can grow into a big, big coral reef.

Small beginnings
Coral Seas

Thursday

Here is a fun and easy craft activity that you could do today! Create your very own underwater scene.

All you need is a piece of paper and some coloured pencils, pens or crayons.

Place your hand sideways on the piece of paper and draw around it to make a fish shape.

Then draw a face and cover your fish with colourful scales and patterns!

If you are feeling a little more adventurous, there are lots of 'rainbow fish' ideas online - just search **safely** with an adult and choose one to do! Here are a couple of ideas.

Friday

Our story this week, The Rainbow Fish, was all about 'sharing'.

Well, we share planet Earth with lots of other people and also lots of spectacular wild animals.

Here is a wonderful nature clip reminding us just why we need to take care of planet Earth - because it is a home that we 'share'!

Prequel - Planet Earth: A Celebration
DURATION: 03:30
