

## How to set up Safe Search on Google

1. Visit the <http://www.google.com/preferences>
2. Find the "SafeSearch filters" section.
3. Turn on SafeSearch by checking the box beside "Filter explicit results." When SafeSearch is on, sexually explicit video and images will be filtered from Google Search result pages, along with results that might link to explicit content.
4. Turn off SafeSearch by unchecking the box. When SafeSearch is off, we'll provide the most relevant results for your search and may include explicit content when you search for it.
5. Click **Save** button at the bottom of the page.
6. Go to the Search settings page
