

Mo says,

To find 10% you divide
by 10, so to find 50%
you divide by 50

Do you agree? Explain why.

Eva says to find 1% of a number, you divide by 100

Whitney says to find 1% of a number, you divide by 10 and then by 10 again.

Who do you agree with?
Explain your answer.

Complete the missing numbers.

$$50\% \text{ of } 40 = \underline{\quad\quad} \% \text{ of } 80$$

$$\underline{\quad\quad} \% \text{ of } 40 = 1\% \text{ of } 400$$

$$10\% \text{ of } 500 = \underline{\quad\quad} \% \text{ of } 100$$

Four children were asked to find 20% of an amount.

Whitney

I divided by 5 because 20% is the same as one fifth

I found one percent by dividing by 100, then I multiplied my answer by 20

Alex

I did 10% add 10%

I found ten percent by dividing by 10, then I multiplied my answer by 2

Amir

Jack

Who do you think has the most efficient method?
Explain why.

Who do you think will end up getting the answer incorrect?

How many ways can you find 45% of 60?

Use similar strategies to find 60% of 45

What do you notice?

Does this always happen?

Can you find more examples?

What percentage questions can you ask about this bar model?

Fill in the missing values to make this statement correct.

Can you find more than one way?

$$25\% \text{ of } \boxed{} = \boxed{}\% \text{ of } 60$$

A golf club has 200 members.

58% of the members are male.

50% of the female members are children.

(a) How many male members are in the golf club?

(a) How many female children are in the golf club?
