

# Stoke Hill Junior School

## Update 9.10.20

### Remote Learning

Over the coming months it is quite likely that some children will have to isolate at home for Covid-related reasons. In this event, we will be using Google Classroom as our online learning platform to set and respond to their work. The platform will also allow us to give the children daily opportunities to engage face-to-face with their teacher, and to carry out most if not all of the learning tasks they would have been doing if they were in school.

The children are being taught in school how to access their learning on Google Classroom. To support this, we have attached a 'How To' guide for parents and a more comprehensive 'step by step' guide to using the platform. Mr Mead has also created this video showing the children how to log in at home and how to complete the assignment:

<https://www.youtube.com/watch?v=DxnuLXFk-pU>

Over the weekend we would like all of the children to practise logging in to the system. They will find that they have been set a 'checking in' assignment to complete. This will only take a few minutes, and will allow us to see if there are any children who need extra support with using the system.

We will be using Google Classroom in school over the coming months to make sure all the children are as familiar with it as possible. There are bound to be a few glitches as we get going, so please be patient with us!

## **Class Superstars 9.10.20**

This week we asked the teachers to tell us something that they think their class has been brilliant at this week. We have shared the reasons across the school to inspire the children for the next week. Here are this week's reason to celebrate:

3G - My class has been great this week because they have completed so many AR quizzes with 100%. I am also really impressed with how much interest they have shown in the work on volcanoes.

3T - My class has been great this week because they have been super organised and have worked really hard on Google Classroom.

3M - My class has been great this week because they have been so quick at learning how to use all of our online programmes like Mathletics and Google Classroom.

4CP - My class has been great this week because they have been magnificent with their maths and in English have tried hard to learn their spellings, improve their handwriting and set out speech correctly in their written work.

4O - My class has been great this week because they have been using Google Classroom brilliantly to present their learning about the Ancient Greeks.

4LP - My class has been great this week because they are taking part in the Daily Exercise with gusto, already getting fitter and beating their own challenges.

5HM - Our class has been great this week because they have an excellent attitude towards learning and engage well with TT Rockstars.

5J - My class has been great this week because they have produced some amazing fairy tale villain speeches and fact files. I'm so proud of their beautiful work.

5M - My class has been great this week because they have worked really hard on the presentation of their fairytale writing. They look absolutely fantastic!

6M - My class has been great this week because they have had a fantastic attitude towards their learning and are pushing themselves to achieve their best work.

6B - My class has been great this week because they took on the challenge of learning long division and now it is their favourite calculation method!

6AE - Our class has been great this week because they are enthusiastic about learning and using technical vocabulary in our "Cracking Contraptions" English work.

Have a good weekend ~ *Roy Souter*
