

Science Objective Coverage & Progression 2020-2021

	Breadth of Study	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Biology	Plants		<ul style="list-style-type: none"> - Identify and name a variety of common plants and trees - Identify and describe the basic structure of a variety of flowering plants - Observe and describe how seeds and bulbs grow into mature plants. - Find out and describe what plants need to grow and stay healthy. 		<ul style="list-style-type: none"> - Identify and describe the functions of different parts of flowering plants: roots, stem, leaves and flowers. - Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant. - Investigate the way in which water is transported within plants - Explore the role of flowers in the life cycle of flowering plants, including pollination, seed formation and seed dispersal 			<ul style="list-style-type: none"> - Relate knowledge of plants to studies of evolution and inheritance. - Relate knowledge of plants to studies of all living things.
	Animals; including humans		<ul style="list-style-type: none"> - Identify and name a variety of common animals - Identify name, draw and label the basic parts of the human body and say which part of the body is associated with each sense. 	<ul style="list-style-type: none"> - Identify carnivores, herbivores and omnivores. - Describe and compare the structure of a variety of common animals (birds, fish, amphibians, reptiles, mammals and 	<ul style="list-style-type: none"> - Identify that humans and some animals have skeletons and muscles for support, protection and movement. 	<ul style="list-style-type: none"> - Identify that animals, including humans, need the right types and amounts of nutrition - Construct and interpret a variety of food chains, identifying producers, predators and prey 	<ul style="list-style-type: none"> - Describe the changes as humans develop to old age. - Identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood. 	

Science Objective Coverage & Progression 2020-2021

			<ul style="list-style-type: none"> - Describe the basic needs of animals, including humans, for survival - Describe the importance for humans of exercise, eating the right amounts of different types of food and hygiene. - Notice that animals, including humans, have offspring which grow into adults. 	<ul style="list-style-type: none"> invertebrates, including pets). - Identify and name a variety of plants and animals and their habitats - Investigate and describe the basic needs of animals, including humans, for survival - Describe the importance for humans of exercise, eating the right amounts of different types of food and hygiene. 		<ul style="list-style-type: none"> - Describe the simple functions of the basic parts of the digestive system in humans - Identify the different types of teeth in humans and their simple functions. 	<ul style="list-style-type: none"> - Recognise the importance of diet, exercise, drugs and lifestyle on the way the human body functions. - Describe the ways in which nutrients and water are transported within animals, including humans. 	
	Investigate living things			<ul style="list-style-type: none"> - Explore and compare the differences between things that are living, that are dead and that have never been alive. - Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants. - Describe how animals obtain their 		<ul style="list-style-type: none"> - Recognise that living things can be grouped in a variety of ways - Explore and use classification keys - Recognise that environments can change and that this can sometimes pose dangers to specific habitats 	<ul style="list-style-type: none"> - Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird. - Describe the life process of reproduction in some plants and animals. - Describe how living things are classified into broad groups according to common observable characteristics. - Give reasons for classifying plants and animals based on specific characteristics. 	

Science Objective Coverage & Progression 2020-2021

				food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.				
	Evolution and inheritance			- Identify how humans resemble their parents in many features				- Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago. - Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents. - Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.

Science Objective Coverage & Progression 2020-2021

Chemistry	Investigate materials		<ul style="list-style-type: none"> - Identify and name some common materials - Compare and group together a variety of everyday materials on the basis of their simple physical properties. 	<ul style="list-style-type: none"> - Distinguish between an object and the material from which it is made - Identify, name and describe a wide variety of everyday materials - Compare and group together a variety of everyday materials on the basis of their simple physical properties. - Find out how the shapes of some solid objects can be changed by squashing, bending, twisting and stretching. - Identify and compare the suitability of a variety of everyday materials for particular uses 	<ul style="list-style-type: none"> - Compare and group together different kinds of rocks on the basis of their simple, physical properties - Relate the simple physical properties of some rocks to their formation (igneous or sedimentary) - Describe in simple terms how fossils are formed when things that have lived are trapped within sedimentary rock - Recognise that soils are made from rocks and organic matter 	<ul style="list-style-type: none"> - Compare and group materials together, according to whether they are solids, liquids or gases. - Observe that some materials change state when they are heated or cooled, and measure the temperature at which this happens in degrees Celsius (°C), - Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature. 	<ul style="list-style-type: none"> - Compare and group together everyday materials based on evidence from comparative and fair tests - Understand how some materials will dissolve in liquid to form a solution and describe how to recover a substance from a solution. - Use knowledge of solids, liquids and gases to decide how mixtures might be separated - Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials - Demonstrate that dissolving, mixing and changes of state are reversible changes. - Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible 	
Physics	Movement, forces and magnets			<ul style="list-style-type: none"> - Compare how different things move 	<ul style="list-style-type: none"> - Compare how things move on different surfaces. 		<ul style="list-style-type: none"> - Explain that unsupported objects fall towards the Earth because of the force of 	<ul style="list-style-type: none"> - Describe magnets as having two poles - Predict whether two magnets will attract

Science Objective Coverage & Progression 2020-2021

					<ul style="list-style-type: none"> - Notice that some forces need contact between two objects, but magnetic forces can act at a distance - Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials. - Predict whether two magnets will attract or repel each other, depending on which poles are facing. - Describe magnets as having two poles - Observe how magnets attract or repel each other and attract some materials and not others. 	<ul style="list-style-type: none"> gravity acting between the Earth and the falling object. - Identify the effect of drag forces, such as air resistance, water resistance and friction that act between moving surfaces - Understand that some mechanisms including levers, pulleys and gears, allow a smaller force to have a greater effect. 	<ul style="list-style-type: none"> or repel each other, depending on which poles are facing.
	Understand the Earth's movement in space		<ul style="list-style-type: none"> - Observe changes across the four seasons. - Observe and describe weather associated with the seasons and how day length varies. 			<ul style="list-style-type: none"> - Describe the movement of the Earth, and other planets, relative to the Sun in the solar system. - Describe the movement of the Moon relative to the Earth - Describe the Sun, Earth and Moon as approximately spherical bodies 	

Science Objective Coverage & Progression 2020-2021

							- Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky	
Light and seeing		- Observe and name a variety of sources of light, including electric lights, flames and the Sun, explaining that we see things because light travels from them to our eyes.		- Recognise that light from the sun can be dangerous and that there are ways to protect their eyes - Recognise that shadows are formed when the light from a light source is blocked by a solid object. - Find patterns in the way that the size of shadows change - Notice that light is reflected from surfaces - Recognise that they need light in order to see things and that dark is the absence of light.				- Understand that light appears to travel in straight lines. - Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eyes - Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them, and to predict the size of shadows when the position of the light source changes. - Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes.
Sound and hearing						- Identify how sounds are made, associating		

Science Objective Coverage & Progression 2020-2021

						<p>some of them with something vibrating</p> <ul style="list-style-type: none"> - Recognise that vibrations from sounds travel through a medium to the ear 	
	Electricity and circuits			<ul style="list-style-type: none"> - Identify common appliances that run on electricity. - Construct a simple series electrical circuit. 		<ul style="list-style-type: none"> - Identify common appliances that run on electricity - Construct a simple series electrical circuit, identifying and naming its basic parts - Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit - Recognise some common conductors and insulators - Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery 	<ul style="list-style-type: none"> - Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit. - Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches. - Use recognised symbols when representing a simple circuit in a diagram.

Science Objective Coverage & Progression 2020-2021

Working Scientifically	<ul style="list-style-type: none"> - Ask simple questions - Observe and take part in simple test and experiments - Make simple suggestions and predictions 	<ul style="list-style-type: none"> - Ask simple questions. - Observe closely, using simple equipment. - Perform simple tests. - Identify and classify. - Use observations and ideas to suggest answers to questions. - Gather and record data to help in answering questions. 	<ul style="list-style-type: none"> - Ask relevant questions. -Set up simple, practical enquiries and comparative and fair tests. - Make accurate measurements using standard units, using a range of equipment, e.g. thermometers and data loggers. - Gather, record, classify and present data in a variety of ways to help in answering questions. - Record findings using simple scientific language, drawings, labelled diagrams, bar charts and tables. - Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions. - Use results to draw simple conclusions and suggest improvements, new questions and predictions for setting up further tests. -Identify differences, similarities or changes related to simple, scientific ideas and processes. - Use straightforward, scientific evidence to answer questions or to support their findings. 	<ul style="list-style-type: none"> - Plan enquiries, including recognising and controlling variables where necessary. - Use appropriate techniques, apparatus, and materials during fieldwork and laboratory work. - Take measurements, using a range of scientific equipment, with increasing accuracy and precision. - Record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, bar and line graphs, and models. - Report findings from enquiries, including oral and written explanations of results, explanations involving causal relationships, and conclusions. - Present findings in written form, displays and other presentations. - Use test results to make predictions to set up further comparative and fair tests. - Use simple models to describe scientific ideas, identifying scientific evidence that has been used to support or refute ideas or arguments.
