

Year 4 Multiplication Tables Check 2021

What is the Multiplication Tables Check?

The Multiplication Tables Check tests your children on their times tables up to 12. The results help the teachers identify which tables your child needs extra help with.

How does the Multiplication Tables Check work?

The Multiplication Tables Check will be done on a computer. The children will get 3 practise questions to complete at the start of the test. They will then answer 25 multiplication questions. For each question, the children will have 6 seconds to provide an answer. On average, the check should take no longer than 5 minutes to complete.

When will the Multiplication Tables Check take place?

All children in Year 4 will take the Multiplication Tables Check, in June 2021.

How will the results be used?

Schools will be able to view the results once all pupils have taken the check. Schools will then share each child's score with their parents.

It is important to remember that these results will help teachers identify where your child may need extra help. If you have any questions about your child's results and what support they might need, you should speak to their teacher.

Parent Questionnaire

Please can you fill in the questionnaire about the Multiplication Tables Check.

There are only 4 questions for you to complete.

4x Table:

Table Toons

Learn your Times Tables with music. There are different songs you can sing along to and pictures and lyrics to help you remember the words.

Strategies you could try with your child:

Double, Double!

A quick trick for learning the fours is just to double, double. Double the number and then double it again.

For example;

3 x 4 double 3 is 6, double 6 is 12

5 x 4 double 5 is 10, double 10 is 20

6 x 4 double 6 is 12, double 12 is 24

9 x 4 double 9 is 18, double 18 is 36

9 times table on your fingers

1. Hold your hands in front of you with your fingers spread out.
2. For 9 x 4 bend your 4th finger (like in the picture).
3. You have 3 fingers in front of the bent finger and 6 after the bent finger. So the answer must be 36!
4. The technique works for the 9 times table up to 9 x 10.

Multiplication Snap!

You will need a deck of cards for this game.

1. Flip over the cards as though you are playing snap.

2. The first to say answer to the cards shown gets to keep the cards. For

example:  7x8 = 56

3. The person to get all of the cards wins.
