

Multiplication

Year 1 Multiply with concrete objects, arrays and pictorial representations.

There are 3 sweets in one bag. How many sweets are in 5 bags altogether?

How many legs will 3 teddies have?

$3 + 3 + 3 = 9$

$2 + 2 + 2 = 6$

Year 2 Multiply using arrays and repeated addition.

$4 \times 5 = \dots$

4 lots of 5

$5 \times 3 = 15$

$3 \times 5 = 15$

$5 \times 3 = 3 + 3 + 3 + 3 + 3 = 15$

$4 \times 5 = 20$

Year 3 Multiply 2-digits by a single digit number (grid method)

Eg. $23 \times 8 = 184$

X	20	3
8	160	24

Continue to use repeated addition on number lines as above (where needed) to reinforce how to calculate multiplication facts.

Year 4 Multiply 2 and 3-digits by a single digit (grid method)

Eg. $136 \times 3 = 680$

X	100	30	6
5	500	150	30

$500 + 150 + 30 = 680$

Year 5 Multiply up to 4-digits by 1 or 2 digits. Start with the units. Long multiplication for multiplying by 2-digit numbers.

Start with the units. Long multiplication for multiplying by 2-digit numbers:

Put a 0 in units first when multiplying tens

Year 6 As Y5, and multiply decimals with up to 2d.p by a single digit.

Key vocab: groups of, lots of, times, array, altogether, multiply, total, count up in...

Key skills for multiplication at Y1: Count in 2s, 5s and 10s. Solve 1-step problems involving multiplication, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher. Make connections between arrays, number patterns, and counting in twos, fives and tens. Begin to understand doubling using concrete objects and pictorial representations.

Key vocabulary: As before, & multiplied by, column, row, repeated addition, commutative, sets of, equal groups, times as big as, once, twice, three times etc.

Key skills for multiplication at Y2: Count in steps of 2, 3 and 5 from 0, and in 10s from any number. Recall and use multiplication facts from the 2, 5 and 10 multiplication tables, incl. recognising odds and evens. Write and calculate number statements using the \times and $=$ signs. Show that multiplication can be done in any order (commutative). Solve a range of problems involving multiplication, using materials, arrays, repeated addition, mental methods, and multiplication facts.

Key vocabulary: As before, & partition, grid method, multiple, product, tens, units, value

Key skills for multiplication at Y3: Recall and use multiplication facts for the 2, 3, 4, 5, 8 and 10 multiplication tables, and multiply multiples of ten. Write and calculate number statements using the multiplication tables they know, incl. 2-digit \times single-digit, drawing upon mental methods, and progressing to reliable written methods. Solve multiplication problems, including missing number problems. Develop mental strategies using commutativity (e.g. $4 \times 12 \times 5 = 4 \times 5 \times 12 = 20 \times 12 = 240$)

Key vocabulary: As before, & square, factor, integer, decimal, short/long multiplication, carry

Key skills for multiplication at Y4: Count in multiples of 6, 7, 9, 25 and 1000. Recall multiplication facts for multiplication tables up to 12×12 . Recognise place value of digits in up to 4-digit numbers. Use place value, known facts and derived facts to multiply mentally, e.g. multiply by 1, 10, 100, by 0, or multiply 3 numbers. Use commutativity and other strategies in mental calculations $3 \times 6 = 6 \times 3$, $2 \times 6 \times 5 = 10 \times 6$, $39 \times 7 = 30 \times 7 + 9 \times 7$.

Key vocabulary: As before, & cubed, integer, square, factor, integer, decimal, short/long multiplication, carry

Key skills for multiplication at Y5: Identify multiples and factors, using knowledge of multiplication tables to 12×12 . Solve problems where larger numbers are decomposed into their factors. Multiply and divide integers and decimals by 10, 100, 1000. Recognise and use square and cube numbers and their notation.

Key vocabulary: As before, & tenths, hundredths

Key skills for multiplication at Y6: Multiply multi-digit numbers, up to 4-digit \times 2-digit using long multiplication. Perform mental calculations with mixed operations and large numbers. Estimate answers using round and approximation and determine levels of accuracy. Round any integer to a required degree of accuracy.

Division

Year 1 Group and share small quantities Using objects, diagrams and pictorial representations to solve problems about both grouping and sharing.

How many groups of 4 can be made with 12 stars? = 3

12 shared between 3 is 4

Year 2 Group and share, using the \div sign Use objects, arrays, diagrams and pictorial representations, and repeated addition on a number line.

$12 \div 3 = 4$

Year 3 Divide 2-digit numbers by a single digit (no remainders in the final answer) SHORT DIVISION: Remainders carried within the calculation once confident with the method:

$32 \div 2 = 16$

Year 4 Divide up to 3-digit numbers by a single digit (without remainders) SHORT DIVISION:

$218 \div 2 = 109$

Year 5 Divide up to 4 digits by a single digit, including those with remainder answers. SHORT DIVISION:

$535 \div 5 = 107$

Year 6 Divide at least 4-digit numbers by 1 or 2 digits (incl. decimal numbers / quantities) Long division by chunking:

$0.8125 \div 27 = 0.0301$

Long division is used for dividing by a 2-digit number:

$27 \div 7 = 3$ remainder 6

Key vocabulary: share, share equally, one each, two each, group, groups of, lots of, array

Key number skills needed at Y1: Solve one-step problems, calculating answers using concrete objects, pictorial representations arrays with support. Through grouping and sharing small quantities, begin to understand division, and find simple fractions of objects, numbers / quantities. Make connections between arrays, number patterns, and counting in 2s, 5s and 10s.

Key vocabulary: As before, & divide, divided by, divided into, division, grouping, number line, left, left over

Key number skills needed at Y2: Count in 2s, 5s and 10s. Recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, recognising odds and evens. Calculate statements for multiplication and division within the multiplication tables, writing them using \times , $+$ and $=$ signs. Show that division cannot be done in any order. Solve problems in context using materials, arrays, repeated addition, mental methods, multiplication and division facts.

Key vocabulary: As before & inverse, short division, carry, remainder, multiple

Key number skills needed at Y3: Recall and use multiplication/division facts for 2, 3, 4, 5, 8, 10 multiplication tables (through doubling, connect the 2, 4 and 8s), Write and calculate number statements for multiplication and division using multiplication tables that they know, including for 2-digit numbers times 1-digit numbers. Solve problems, in contexts, and including missing number problems, involving multiplication and division. Develop efficient mental methods, e.g. using multiplication and division facts (e.g. using $3 \times 2 = 6$, $6 \div 3 = 2$ and $2 \times 6 = 12$ to derive related facts ($30 \times 2 = 60$, $60 \div 3 = 20$ and $20 \times 3 = 60 + 3$).

Key vocabulary: As before & divisible by, factor

Key number skills needed at Y4: Recall all multiplication and division facts up to 12×12 . Use place value, known and derived facts to multiply and divide mentally, incl. multiplying and dividing by 10 and 100 and extend mental methods to 3-digit numbers, deriving facts, for example $200 \times 3 = 600$ so $600 \div 3 = 200$. Use short division with exact answers. Use short division methods to 3-digit numbers, deriving facts, for example $200 \times 3 = 600$ so $600 \div 3 = 200$. Solve 2-step problems in contexts, choosing the appropriate operation, working with increasingly harder numbers. This should include correspondence questions such as three cakes shared equally between 10 children.

Key vocabulary: As before & quotient, prime number, prime factors, composite number (non-prime)

Key number skills needed at Y5: Recall multiplication / division facts for all numbers up to 12×12 . Identify multiples and factors of any number. Multiply and divide whole numbers and those involving decimals by 10, 100 and 1000. Work out if numbers to 100 are prime, recalling primes to 19. Use multiplication and division as inverses. Express remainder answers as fractions, decimals or rounded numbers, as appropriate to the context of the problem.

Key vocabulary: As before, & common factor

Key number skills needed at Y6: Use multiplication and division facts for all numbers to 12×12 for more complex calculations. Identify common factors, common multiples and prime numbers as rounded numbers, fractions or decimals. Use estimation to check answers to calculations.

Addition

Year 1 Add with numbers up to 20

Use number tracks, practical methods and numbered number lines to add by counting on in ones, and using the addition (+) and equals (=) signs.

Encourage to start with the larger number

Examples: $8+3=$ \square $15+4=$ \square $5+3+1=$ \square $\square+\square=6$

Year 2 Add with 2-digit numbers

Add pairs of 2-digit numbers (add tens then units, starting with the largest number):

Lead to expanded column method, only introducing examples that cross tens boundary when ready.

Recall bonds to 20 and bonds of tens to 100 (30 + 70 etc.). Add three one-digit numbers (e.g. $5 + 9 + 7$). Add pairs of 2-digit numbers (e.g. $35 + 47$). Add a 2-digit number and ones (e.g. $27 + 6$). Add a 2-digit number and tens (e.g. $23 + 40$). Add three one-digit numbers (e.g. $5 + 9 + 7$). Show that adding can be done in any order.

Recall bonds to 20 and bonds of tens to 100 (30 + 70 etc.). Understand the place value of 2-digit numbers (tens and units). Compare and order numbers to 100 using $<$ and $=$ signs. Read and write numbers to at least 100 in numerals and words.

Key vocabulary: As before, & sum, tens, ones, partition, addition, column, tens boundary

Key number skills needed at Y2:

Key number skills needed at Y2:

Key vocabulary: As before, & sum, tens, ones, partition, addition, column, tens boundary

Year 3 Add with numbers up to 3-digits

Expanded column method, adding units, tens and hundreds, using carrying.

Progressing to the compact method, using carrying.

236 + 73 = 309

30 + 70 = 100
200 + 0 = 200
300 + 0 = 300

Using the compact column method, adding units first, and 'carrying' numbers underneath the calculation. Pupils should also add money and measures. e.g. $3517 + 396 = 3913$

Key vocabulary: As before, & hundreds boundary, increase, vertical, carry, expanded, compact

Key number skills needed at Y3:

Read and write numbers to 1000 in numerals and words. Add 2-digit numbers mentally, incl. those exceeding 100. Add a three-digit number and ones mentally (175 + 8). Add a three-digit number and tens mentally (249 + 50). Add a three-digit number and hundreds mentally (381 + 400). Estimate answers to calculations, using inverse to check answers. Recognise place value of digits in 3-digit numbers (hundreds, tens, units)

Year 4 Add numbers with up to 4 digits

Select most appropriate method: mental, jottings or written and explain why.

Recognise the place value of each digit in a four-digit number. Round any number to the nearest 10, 100 or 1000. Estimate and use inverse operations to check answers. Find 1000 more or less than a given number.

Key vocabulary: As before & thousands, hundreds, digits, inverse

Key number skills needed at Y4:

Key number skills needed at Y4:

Year 5 Add numbers with more than 4 digits

Including money, measures and decimals with different numbers of decimal places.

£23.59 + £7.55 = £31.14

£23.59 + £7.55 = £31.14

£23.59 + £7.55 = £31.14

Key vocabulary: As before & decimal places, decimal point, tenths, hundredths, thousandths

Key number skills needed at Y5:

Add numbers mentally with increasingly large numbers. Use rounding to check answers and accuracy. Read, write, order and compare numbers to at least 1 million and determine the value of each digit. Round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000.

Year 6 Add several numbers of increasing complexity

Perform mental calculations, including with mixed operations and large numbers. Use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy. Read, write, order and compare numbers up to 10 million and determine the value of each digit. Round any whole number to a required degree of accuracy.

Use negative numbers in context, calculating intervals across zero. Round any whole number to a required degree of accuracy. Determine the value of each digit. Read, write, order and compare numbers up to 10 million and decide which operations and methods to use and why. Solve addition and subtraction multi-step problems in context. **Key number skills needed at Y6:**

Year 1 Subtract from numbers up to 20

Count back in ones on a numbered number line to take away.

Find the 'distance between' including 'how many more' and 'how many less' is introduced practically by counting on.

7 - 4 = 3

Count back in ones on a numbered number line to take away.

Find the 'distance between' including 'how many more' and 'how many less' is introduced practically by counting on.

Year 2 Subtract with 2-digit numbers

Subtract by counting back, gradually using more efficient jumps:

47 - 23 = 24

Use counting on as a mental strategy for subtraction where numbers are close together e.g. 42-38:

42 - 38 = 4

Use counting on as a mental strategy for subtraction where numbers are close together e.g. 42-38:

42 - 38 = 4

Key vocabulary: As before, & difference, count on, strategy, partition, tens, units

Key number skills needed at Y2:

Recognise the place value of each digit in a two-digit number. Recall and use subtraction facts to 20 fluently, and derive and use related facts up to 100. Subtract using concrete objects, pictorial representations, 100 squares and mentally, including: a two-digit number and ones, a two-digit number and tens, and two two-digit numbers. Show that subtraction cannot be done in any order. Recognise and use inverse relationship between addition and subtraction, to check calculations and missing number problems.

Year 3 Subtract with 2 and 3-digit numbers

Partitioned column subtraction method.

89 - 35 = 54

80 + 9 = 89

80 + 9 = 89

Partitioned column subtraction method.

Money: partition as £1 + 30 + 5 etc.

50 + 4 = 54

50 + 4 = 54

Key vocabulary: As before, & inverse

Key number skills needed at Y3:

Subtract mentally: A 3-digit number and ones; a 3-digit number and tens; a 3-digit number and hundreds. Estimate answers and use inverse operations to check. Solve problems, including missing number problems. Find 10 or 100 more or less than a given number. Recognise the place value of each digit in a 3-digit number.

Year 4 Subtract with up to 4-digit numbers

Partitioned column subtraction method with exchanging.

2754 - 1562 = 1192

2000 + 700 + 50 + 4 = 2754

1000 + 500 + 100 + 2 = 1562

Partitioned column subtraction method with exchanging.

2754 - 1562 = 1192

2000 + 700 + 50 + 4 = 2754

1000 + 500 + 100 + 2 = 1562

Key vocabulary: As before, & tenths, hundredths, decimal point, decimal

Key number skills needed at Y4:

Subtract numbers mentally with increasingly large numbers. Use rounding and estimation to check answers to calculations. Solve addition and subtraction multi-step problems in context, deciding which operations and best methods to use and why. Read, write, order and compare numbers to at least 1 million and determine the value of each digit. Count forwards or backwards in steps of 10, 100, 1000, 10,000. Interpret negative numbers in context, counting forwards and backwards with positive and negative integers through 0.

Year 5 Subtract with at least 4-digit numbers

Column subtraction method:

7169.0 - 372.5 = 6796.5

7169.0 - 372.5 = 6796.5

Column subtraction method:

7169.0 - 372.5 = 6796.5

7169.0 - 372.5 = 6796.5

Key vocabulary: As before, & tenths, hundredths, decimal point, decimal

Key number skills needed at Y5:

Subtract numbers mentally with increasingly large numbers. Use rounding and estimation to check answers to calculations. Solve addition and subtraction multi-step problems in context, deciding which operations and best methods to use and why. Read, write, order and compare numbers to at least 1 million and determine the value of each digit. Count forwards or backwards in steps of 10, 100, 1000, 10,000. Interpret negative numbers in context, counting forwards and backwards with positive and negative integers through 0.

Year 6 Subtract with increasingly large and more complex numbers and decimal values

Column subtraction method:

6075.0 - 899.4 = 5175.6

6075.0 - 899.4 = 5175.6

Column subtraction method:

6075.0 - 899.4 = 5175.6

6075.0 - 899.4 = 5175.6

Key vocabulary: As before, & tenths, hundredths, decimal point, decimal

Key number skills needed at Y6:

Solve addition and subtraction multi-step problems in context, deciding which operations and methods to use and why. Read, write, order and compare numbers up to 10 million and determine the value of each digit. Round any whole number to a required degree of accuracy. Use negative numbers in context, calculating intervals across zero.

Subtraction

Year 1 Subtract from numbers up to 20

Count back in ones on a numbered number line to take away.

7 - 4 = 3

Count back in ones on a numbered number line to take away.

Find the 'distance between' including 'how many more' and 'how many less' is introduced practically by counting on.

Year 2 Subtract with 2-digit numbers

Subtract by counting back, gradually using more efficient jumps:

47 - 23 = 24

Use counting on as a mental strategy for subtraction where numbers are close together e.g. 42-38:

42 - 38 = 4

Use counting on as a mental strategy for subtraction where numbers are close together e.g. 42-38:

42 - 38 = 4

Key vocabulary: As before, & difference, count on, strategy, partition, tens, units

Key number skills needed at Y2:

Recognise the place value of each digit in a two-digit number. Recall and use subtraction facts to 20 fluently, and derive and use related facts up to 100. Subtract using concrete objects, pictorial representations, 100 squares and mentally, including: a two-digit number and ones, a two-digit number and tens, and two two-digit numbers. Show that subtraction cannot be done in any order. Recognise and use inverse relationship between addition and subtraction, to check calculations and missing number problems.

Year 3 Subtract with 2 and 3-digit numbers

Partitioned column subtraction method.

89 - 35 = 54

80 + 9 = 89

80 + 9 = 89

Partitioned column subtraction method.

Money: partition as £1 + 30 + 5 etc.

50 + 4 = 54

50 + 4 = 54

Key vocabulary: As before, & inverse

Key number skills needed at Y3:

Subtract mentally: A 3-digit number and ones; a 3-digit number and tens; a 3-digit number and hundreds. Estimate answers and use inverse operations to check. Solve problems, including missing number problems. Find 10 or 100 more or less than a given number. Recognise the place value of each digit in a 3-digit number.

Year 4 Subtract with up to 4-digit numbers

Partitioned column subtraction method with exchanging.

2754 - 1562 = 1192

2000 + 700 + 50 + 4 = 2754

1000 + 500 + 100 + 2 = 1562

Partitioned column subtraction method with exchanging.

2754 - 1562 = 1192

2000 + 700 + 50 + 4 = 2754

1000 + 500 + 100 + 2 = 1562

Key vocabulary: As before, & tenths, hundredths, decimal point, decimal

Key number skills needed at Y4:

Subtract numbers mentally with increasingly large numbers. Use rounding and estimation to check answers to calculations. Solve addition and subtraction multi-step problems in context, deciding which operations and best methods to use and why. Read, write, order and compare numbers to at least 1 million and determine the value of each digit. Count forwards or backwards in steps of 10, 100, 1000, 10,000. Interpret negative numbers in context, counting forwards and backwards with positive and negative integers through 0.

Year 5 Subtract with at least 4-digit numbers

Column subtraction method:

7169.0 - 372.5 = 6796.5

7169.0 - 372.5 = 6796.5

Column subtraction method:

7169.0 - 372.5 = 6796.5

7169.0 - 372.5 = 6796.5

Key vocabulary: As before, & tenths, hundredths, decimal point, decimal

Key number skills needed at Y5:

Subtract numbers mentally with increasingly large numbers. Use rounding and estimation to check answers to calculations. Solve addition and subtraction multi-step problems in context, deciding which operations and best methods to use and why. Read, write, order and compare numbers to at least 1 million and determine the value of each digit. Count forwards or backwards in steps of 10, 100, 1000, 10,000. Interpret negative numbers in context, counting forwards and backwards with positive and negative integers through 0.

Year 6 Subtract with increasingly large and more complex numbers and decimal values

Column subtraction method:

6075.0 - 899.4 = 5175.6

6075.0 - 899.4 = 5175.6

Column subtraction method:

6075.0 - 899.4 = 5175.6

6075.0 - 899.4 = 5175.6

Key vocabulary: As before, & tenths, hundredths, decimal point, decimal

Key number skills needed at Y6:

Solve addition and subtraction multi-step problems in context, deciding which operations and methods to use and why. Read, write, order and compare numbers up to 10 million and determine the value of each digit. Round any whole number to a required degree of accuracy. Use negative numbers in context, calculating intervals across zero.
