'Love the Adventure of Learning'

Friday 5 March Issue 8

Values: Our Value for this term is **Creativity**

But God made the earth by his power; he founded the world by his wisdom and stretched out the heavens by his understanding.

Dear Parents & carers,

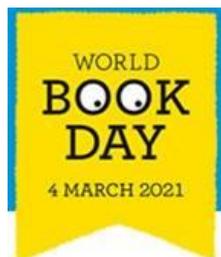

We are looking forward to welcoming all our children back to school on Monday. We will look after them and make sure that we worry more about their wellbeing and mental health over the first few weeks than anything else. We are hoping that this will soon be leading onto a more structured day with the warmer weather on its way and plenty of outdoor learning taking place. Please remember to drop your children off at their entrance and leave as soon as possible to enable the next group to arrive. I look forward to meeting you on Monday.
Rachel Crouch

DATES FOR YOUR DIARY

CALENDAR

- 8 March All children returning to school
- 8 March Science Week
- 12 March Newsletter
- 19 March Newsletter
- 26 March Newsletter

Challenge 6

What an amazing challenge this has been. We have been so excited to see such a creative school with every book character made with such skill. Please look at our webpage for many of our WBD characters on display. Here are some of the winning entries.

Oxford University Press

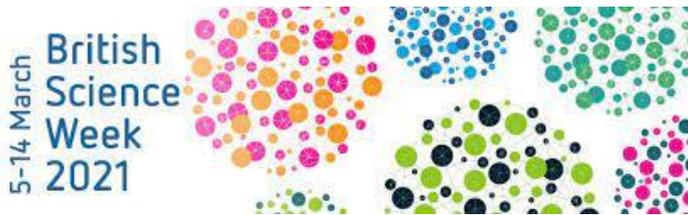

We are looking for any parents who might work in the education sector of OUP. We have been told that we could get a good discount if a parent is employed there. Please let me know if this is the case.

Breakfast Club

Breakfast Club is running from Monday March 8th for Keyworker children and vulnerable groups from 8:00am. Please see further details from Dom Baker.

Science Week Challenge 7

Next week is British Science week and we have lots of brilliant things planned for you all!

A huge thank you to all the parents who came forward and offered your time to share your expertise with our children. Through the planned talks, the children will enjoy learning about flight, sound, rocks and fossils, to name a few, and we even have a virtual visit from some crocodiles!

The theme for the week is 'innovation' so your challenge for the week is to create an idea which could help to save energy, help our planet, save time...up to you!

You don't have to make your innovation – just design it.

Here are some examples of some innovations...

Mug coaster that converts cold/heat to charge your device

A coaster that uses hot or cold drinks to charge your device, innovation at its finest!

Folding bike helmet

A folding bike helmet. A great feature for storing when it's not in use.

School Uniform

We are fully aware how difficult it is to find school uniform at the moment. Please do not worry if you have not managed to get the correct items and are awaiting a delivery. We have been told about this and certainly understand the issue.

Staffing

We would like to welcome Becky Parkes to our school. She will be teaching in 4EW from Monday 8th March. We are so glad that she had an opportunity to meet the children on Zoom this week.

Sadly, we say goodbye to Mr Moore. Mr Moore has helped so many children, mainly in Year 6, over the years and is an amazing specialist maths teacher. His gentle manner and superb teaching have helped so many children to grow in confidence and learn to love the subject. Mr Moore will be greatly missed, and we wish him all the best for the future.
