

Future Career

As you get older, you will start to think about what job you would like to do.

This may change several times between now and when you do actually start working and that is fine.

Some people, however, do know what they want to do and will end up doing that job as an adult.

For now, think about what you might want to do and try and answer these questions.

1. What job would you like when you are older?

2. What does this job involve?

3. What do you think you need to be good at to do that job well?

4. Do you have these qualities and skills yet?

5. What are the skills and qualities you need to work on?

6. What can you do over the next few years to learn these skills and qualities?

7. Who can help you to do this?

8. What will be your number one goal to work on?
