

# The Writing Process\*

Repeat steps as needed!

**Prewriting**

Begin with a word list or mind map your ideas.

Use a story map to plan the characters, setting, problem & solution.

**Writing**

Start writing but focus on the ideas rather than the details. You can make improvements later!

**Rewrite**

Go back to your first draft and make the changes you identified at the revision stage.

**Revise**

Look through your first draft with someone else. Look out for use of vocab, content and organisation as well as anything you need to add, change or move.

**Proofread**

Correct any spelling, grammar and punctuation errors. Make sure that your writing flows correctly too.

**Publish**

Share your finished story!
