

Issues with Flash

If you have any issues with Flash, it is normally because your browser has disabled it. If you are using Chrome, click on this (shown in image)

Then always allow flash and pop ups on the site that is causing you issues, then refresh the page.

You might also need to update it. <https://get.adobe.com/flashplayer/>

If you have an Android Tablet or apple device at home to do things like my maths, flash is no longer supported on the mainstream browsers. There is a free app called 'Puffin Academy' that will allow you to use flash.
