

Alive, dead or never been
alive!

How do we know something is alive?

Living things can:

- ▶ Breathe
- ▶ Reproduce
- ▶ React to their surroundings
- ▶ Loose waste

How do we know something is dead?

Dead things were once alive and could do all the things living things can do like breathe and reproduce.

Things that have never been alive have never done any of these things. They are usually just materials and made of materials like metal and plastic.

TASK!

Can you identify whether these things are alive, dead or have never been alive?

Alive	Dead	Never Been Alive

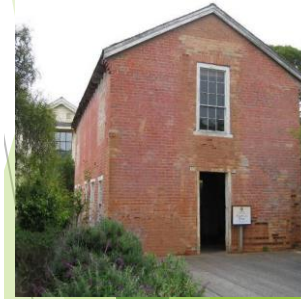

Sort the animals into the correct habitats.

Where would each animal live?

-----,-----,-----

Alive	Dead	Never Been Alive

Pictures to sort into the table. (if unable to access these write or draw some of your own into a table!)
