

## My Penguin Poem

The Emperor is the biggest,  
Standing nearly 4 feet tall.

Poor old Galapagos,  
The most endangered of them all.

Gentoo is the quickest,  
It easily slips through the waves.

While Eudyptula Minor is the smallest,  
Not much fish does it crave.

All of the penguins are kind and clever,  
When they find a mate they stay together forever.

But penguin populations are declining fast,  
If we don't help them soon they'll be a thing of the past.

So please help save a penguin,

Please be one's friend.

And maybe just maybe,

Penguins shall be happy again.
