MATHS LESSON

Complete a daily maths lesson from whiterosemaths.com/homelearning/ or www.iseemaths.com
I've tried both of these, and they're pretty good.

MAKING A 'MINI ME'

Have a go at using a tape measure and ruler to take measurements of your body. Record these in a table. It's probably best to work in cm.

Recordings might include:

- Total height
- Height/width or face
- Shoulder span
- Arm span
- Hip to foot
- Waist to shoulder

And more if you like.

THEN divide each of your measurements by 10, and attempt to use a ruler to sketch a 'mini me' of yourselves. This will be 10% of your actual size! So, if you are 145cm tall, on your page, your height will be 14.5 cm and so on! 10% of you should easily fit onto an A4 sheet of paper.

Then, if you want to take it further after your 10% sketch, make a 3D model of yourself!

These are quite fun to do, but try to remember to measure accurately and record your measurements in a table.

Create a poster or a PowerPoint presentation on an animal/living thing of your choice.

Think about interesting facts related to your creature, including its diet, its habitat, and its behaviour. Include pictures and labelled diagrams. Become an expert on your creature of choice.
