Dear Parents/ Carers,

We are looking at ways of making homework more manageable and easier for the children to access and organise.

We would like to know how parents feel about the idea of accessing the homework electronically through the school website rather than using a paper-based system. The children would be able to complete their work and submit it to the website, so, once the system is up and running, there should be little or no need for them to be able to print.

Please would you be kind enough to let us know your views?

Thank you,

K. Longbourne

K Longbourne
Computing lead.

I would prefer for my child to receive their homework :-

Through the school website/ on paper in an exercise book

(delete as appropriate)

My child **would** / **would not** be able to access the school website to complete homework.

My child / children is/are in year
