13. ETHNICALLY BASED STATISTICS ON SCHOOL PUPILS

Since 1990 all LA maintained schools have been required by the Department for Education (DfE) to collect ethnically based statistics on their pupils. The purpose of the data is to assist the DfE, local authorities, schools and parents/carers to ensure that the education provided in schools meets the needs of all pupils and thus helps to secure equality of opportunity. The data will contribute to local and national statistics, but will not allow an individual child to be identified.

The information will be held as part of the education record of your child and access to it will be limited to those who need it to make suitable educational provision for your child. The information will be given to future schools.

Our ethnic background describes how we think of ourselves. This may be based on many things, including for example, our skin colour, language, culture, and ancestry or family history.

Ethnic background is not the same as nationality or country of birth.
