

Dear Heidi Allen MP,

We are the Eco group at Babraham Primary, and we would like to pass on a message. Thank you in advance for reading.

We love our School, our community, our environment. As children often we feel small; the last priority. We need to make environmental issues the only priority. We find it difficult to listen to people talk about Brexit. When Greta Thunburg said that we started a fire, those words stuck with us; we do have a fire in our hearts.

We don't understand the logic behind the availability of single use plastics, the price of electric cars, the lack of focus on renewable energy, adults who ignore our future. We are so sad to see pictures of the Arctic sea ice melting and of animals and people in so much danger and trouble. It seems crazy and so basic, these things do not add up.

We are planning for our future today in a way that young people didn't have to before.

We understand that you must get so many letters like this one. We hope that you appreciate each one and understand why we are writing.

We understand things cannot change overnight, but we can start taking action now.

Time is precious. We are resilient.

Thank you for reading,

Stella X5,
