Industry is the work and processes involved in collecting raw materials, and making them into products in factories.

The habitat of an animal or plant is the natural environment in which it normally lives or grows.

The geology of an area is the structure of its land, together with the types of rocks and minerals that exist within it.

Recreation consists of things that you do in your spare time to relax.

A national park is a large area of land which is protected by the government because of its natural beauty, plants or animals, and which the public can usually visit.

The area of hills between Winchester and Eastbourne.
