Total score for this year's school experience (marked out of 10): 448

Average score for last year's school experience (marked out of 10): 6.9

Average score for this year's school experience (marked out of 10): 8.5

Positive: 98% of children

Comments:

We're given more time to work independently now.

Everyone has a place they feel comfortable and they work better in that space.

I work better in a comfy space than a hard chair.

When it is peer work we can talk to the people around us (more easily).

It helps me to work better because I feel relaxed. I am more relaxed in my learning.

I get more engaged in my work.

You feel more focused and engaged with the classroom like this.

I find it better for independent work.

I am given more time for my learning and we do things ourself.

We can move about and have more areas to work in.

It's positive because I learn better by myself.

It's better because it's more comfortable and so we don't fidget. If we fidget, we don't concentrate. I don't fidget as much.

The changes are positive because you can sit where it suits you.

I can hear more. (commented upon by two different children).

I can work with the people I learn best with, not just a talk partner. (Commented on by lots of children).

The environment has changed the behaviour and the listening (in a positive way).

I don't fiddle as much.

I think people concentrate more.

I didn't like working at tables.
