## Christopher Columbus

Seventeen ships set sail on his second voyage, which left in September 1493. His third voyage left in 1498 with six ships.

He took three ships on his first voyage in August 1492. He sailed across the Atlantic Ocean for 10 weeks. He thought he had landed in the Indies but had really landed in the Americas.

He set sail on his final voyage in 1502 with four ships. He died in 1506.

He got married in 1479 and had a son the next year. He thought he could find a quicker way to get to the Indies by sailing west. King Ferdinand and Queen Isabella of Spain paid for this voyage.

He moved to Portugal when he became an adult and worked as a mapmaker with his brother. After that he worked as a sailor on a trading ship. He survived a shipwreck in 1476.

Christopher Columbus was born in 1451 in Genoa, Italy. He used to watch the ships when he was a boy. He began working on ships when he was a teenager.

Christopher Columbus took home many things that he found in the Americas. One of his ships sank on the return journey on Christmas Day 1492. He became rich and famous when he returned.
