

Year 5 Easter Project

Have you ever wondered what lies beyond earth?

When we come back after our Easter break, we will be studying space as part of our topic. To prepare us for this new adventure, we would like you to complete a space project during the Easter break. You may complete a 3D model of a famous spacecraft or a model of the solar system. You may research the stars, moon or planets. You might find the first

moon landing more

interesting! You have total freedom to complete a project on whatever space topic you are interested in. We would like it in the form of either a project in a folder, a fantastic poster with loads of details and colours, a 3D model or some suitable presentation that you can share with the class.

In addition to this, we will be doing a **Space Explorers Day on Friday 20th April**. On this day, you will be allowed to dress up in a space themed outfit of your choice. We will be taking part in lots of exciting space related activities throughout the day.
