

In exploring and learning this week...

We have had a busy couple of weeks first finding out about teeth. We had lots of talk around looking after our teeth and most children enjoyed brushing their teeth in school and using our dental mirrors. This then led onto bones which has been very exciting! The children have loved making a 'bone museum', being archaeologists and have even painted a huge dinosaur skeleton which we have covered in sand ready for some paleontologists to discover next week!

Parent reminders

Make sure your child has a named PE kit in school every Thursday.

Please can you return all home learning folders to school every Wednesday. This week we have introduced a new reading record sheet. These will be collected each week so that we can check your child's reading progress. Reading at home makes a huge difference to your child's progress.

Stay and Read sessions will continue every Wednesday at 2.40pm. Please come along, siblings are welcome.

What we will be looking at next week...

As the children have been very interested in bones and museums we will continue with this theme but also take a closer look at rocks and fossils. I think we may well need an extension to our museum! We will use rocks to explore observational drawing, painting as well as exploring weighing, measuring and sorting.

If any of you have any bones, rocks, fossils or books linked to any of these we would love to share them with the children.

The Big Challenge!

Have a go at being an archaeologist! What can you find? You could keep a record of what you discover, measure it and even predict what it might be.

Don't forget to share this with us on Tapestry!
