

12th March 2020

Millfield Nursery

In exploring and learning this week.....

This week in nursery our big idea has been 'Seeds'. Our focus book was 'Flora's Surprise'. The children have enjoyed the powder paints and exploring colour mixing at the craft table to paint different flowers, building green houses in the construction areas inside and outside. Some of the children have been cutting up different types of food that contain seeds and comparing the differences. Mrs Murfet found two bird's nests on the ground in the carpark, the children used magnifying glass to explore looking at them and discovered lots of different insects/bugs living within them.

Parent information

Please can we ask that if your child needs to bring in a comfort toy/teddy that it is not one they need for sleeping, as this does cause great distress if the toy/teddy is misplaced.

If you think your child may be unwell or has a temperature it may be advisable that they remain at home during this time.

Next week our exploring and learning will focus on:

Our big idea next will be birds. Our focus book will be 'Bird builds a nest'.

Cheeky challenge

How many different birds visit your garden?

Upcoming dates

Come and play dates are as follows:

- Monday 23rd March 2pm – 3pm

'Come and Play' is where you are invited to spend some time in the setting, joining your child in their exploring and learning. We have themed some stay and play sessions in the past with particular focuses such as number, writing and games. We will select different days and times throughout the year so that the majority of families have the opportunity to attend. You are welcome to bring along siblings but they will remain your responsibility.
