

## Presenting data

**Tip:** Remember, when reading tally charts,  $\text{||||} = 5$ .

Tony made a tally chart to show the wildlife he spotted in the woods near his house in one day.

| Animal | Number |
|--------|--------|
| Pigeon |        |
| Fox    |        |
| Rabbit |        |
| Badger |        |
| Deer   |        |

- Decide how you could present this information, in a block graph, a bar chart or a pictogram. Draw your graph in the space below. First work out the totals for each of the animals. This will help you to decide on a scale for your graph. Remember to label each axis and give your graph a title.
