

# Reception Newsletter: 4.6.18

## Summer Trip

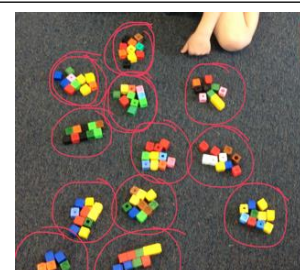

We have booked to take the children to Woodhorn Colliery in Ashington on Tuesday 10<sup>th</sup> July so look out for more information about this in newsletters nearer the time.

## Can you help?

As always, we need your help to be able to take the children out of school. If you can come along and support a group of children on the day please email us or catch us in the yard to let us know.

## Maths

This week we have been counting forwards and backwards in 10s. We have been sorting amounts into groups of five or ten to help us count large amounts. Maybe you could try this at home with cars, pencils, pasta etc. and let us know how you get on?

## Science Week

Its Science Week next week and we have lots of exciting activities planned throughout the week. During the week scientists from Sunderland University will be coming into school to work with us and Laura Prince from LP Dance will be doing a dance lesson with us. We love to hear what the children have to say about their learning so it would be super if you could jot down any comments from your child send them in.

## New Arrivals!

In the classroom we have been observing our caterpillars turn into chrysalides and this week Painted Lady butterflies have finally arrived!

Also, you'll never guess what! The Wagtail who has been very interested in our outdoor area has moved in! She has made a nest and laid eggs in our construction box!
