

Kingfisher and Puffin

Autumn Terms 1 and 2

Key Vocabulary	
habitat	A habitat is the natural place something lives. A habitat provides living things with everything they need to survive such as food, shelter and water.
microhabitat	A microhabitat is a very small habitat in places like under a rock, under leaves or on a branch. Minibeasts live in microhabitats . The microhabitats have everything they need to survive .
depend	Many living things in a habitat depend on each other. This means they need each other for different things.
survive	This means to stay alive.

Key Knowledge

Examples of habitats:

Examples of microhabitats:

Key Vocabulary	
diet	The food and water that an animal needs.
disease	Illness or sickness.
exercise	A physical activity to keep your body fit.
germs	Tiny living things that can cause disease.
hygiene	How we keep ourselves and the world around us clean so we can stay healthy and stop germs spreading.
nutrition	Food needed to live.
pulse	The beating of the heart that can be felt in your neck and wrist.

To stay alive, all animals have three basic needs for survival:

To grow into a healthy adult, we must eat the right types of food in the right amount and **exercise**.

Eatwell Guide

Countries around the world have different **climates**. Countries near the equator have hotter **climates** and the Arctic and Antarctic have much colder **climates**. **Climates** can **affect** many things, such as which plants can grow. Many animals are specially adapted to the climate they live in.
