

Please consider switching-off
your engine while you wait.

Leaving an engine idling increases pollution levels.

This can lead to long-term lung damage.

Children are at particular risk due to their developing lungs.

Vehicle pollution can also trigger asthma attacks, heart attacks
and strokes.

Idling wastes fuel and money.

It adds to CO2 levels which is warming the planet.

The fumes are unhealthy and unpleasant for other people.

The Highway Code also states in rule 123:

*You MUST NOT ... leave a vehicle engine running unnecessarily
while that vehicle is stationary on a public road.*

For everyone's sake, please

switch it off
