

Could you be a superhero?

In Science we will be exploring different materials and their purposes. We will carry out an investigation to find out which material would be best for our Superhero HQ to protect them from the elements.

We will become Superheroes and write diary entries about our heroic adventures. We will be looking at comics and using onomatopoeia in our writing.

We will create a fact page about a famous local hero.

Captain Underpants will be our class read.

We will be thinking about who our own real life heroes are and will share this with the class. We will also find out about a local real life hero.

We will use the green screen to catch us flying through the air!

We will also be designing our own comics using the iPads.

We will be studying the artist Roy Lichtenstein.

We will design and make our own printing tools to create a piece of superhero art.

We will be designing our own superhero lego mini figures and their vehicles, thinking about how we can construct these using axles, wheels and levers.

We will be finding out about different religions special books. We will also be finding out about their heroes and important people.
