

ANCIENT EGYPT

Here are just some of the exciting things we will experience on our journey!

Welcome to the fascinating world of Ancient Egypt! We will be travelling back in time to go on a great expedition! Through our investigative and observational skills, we will discover what life was really like for the Egyptians who lived over two thousand years ago...

In literacy, we will be travelling back in time to recreate the experiences of those that built the pyramids—using our newfound understanding to design comparisons with present day. We will also be exploring the myths and legends of Egyptian gods and having a crack at creating future classics.

During Art lessons, we will be studying Gustav Klimt and his paintings inspired by Ancient Egypt. We will also be exploring perspective and how to create depth in an image.

In DT, we will explore how bread has changed since Ancient Egyptian times, and even making our own!

How on earth did they move those stones?!

In science, we will be looking into levers and pulleys and attempting to understand their impact on engineering.

We will also be thinking like a slave and investigating how to purify water.

We will research Ancient Egyptian death and their traditions, from Anubis to Valley of the Kings.

We will then research and read about how and why bodies were mummified in Ancient Egypt. We will write a clear and comprehensible set of instructions to educate new Embalmers.

We will be continuing to reach for the Sun in Solar maths, or hunt down the pot of gold in Rainbow maths as we keep embedding our fluency skills.
