

11.1 I LIKE TO SHAPE IT, SHAPE IT!

Objective: Identify and make 2D shapes.

Instructions

1. Use cones, toys, books, skipping ropes or stones (or anything practical) to mark out as big a shape as you can in the space you have. This could be a great outdoor activity, but it can also be done inside on the sitting room floor, for example.
2. Change the shape to a different one.

Challenge

How many different shapes can you make? Do you know their names? Can you draw them?
