

6.1 JUST A FRACTION

Objective: Recognise, name and find a quarter as one of four equal parts of a quantity.

Instructions

1. Gather a box or pile of small toys, plastic bricks or beads for example and put them at a start point
2. Set up four other stations some distance away
3. Count out 12 items at the start. Run and distribute one item at a time, alternating between each station
4. How many are at each station? That is a quarter of 12.

Challenge

Increase the number of objects you share between the two stations – to 16, 20 and then 24.
