

South America

Learning Objective:

To find out about the human geography of South America.

NEXT

What is the difference
between human geography
and physical geography?

BACK

NEXT

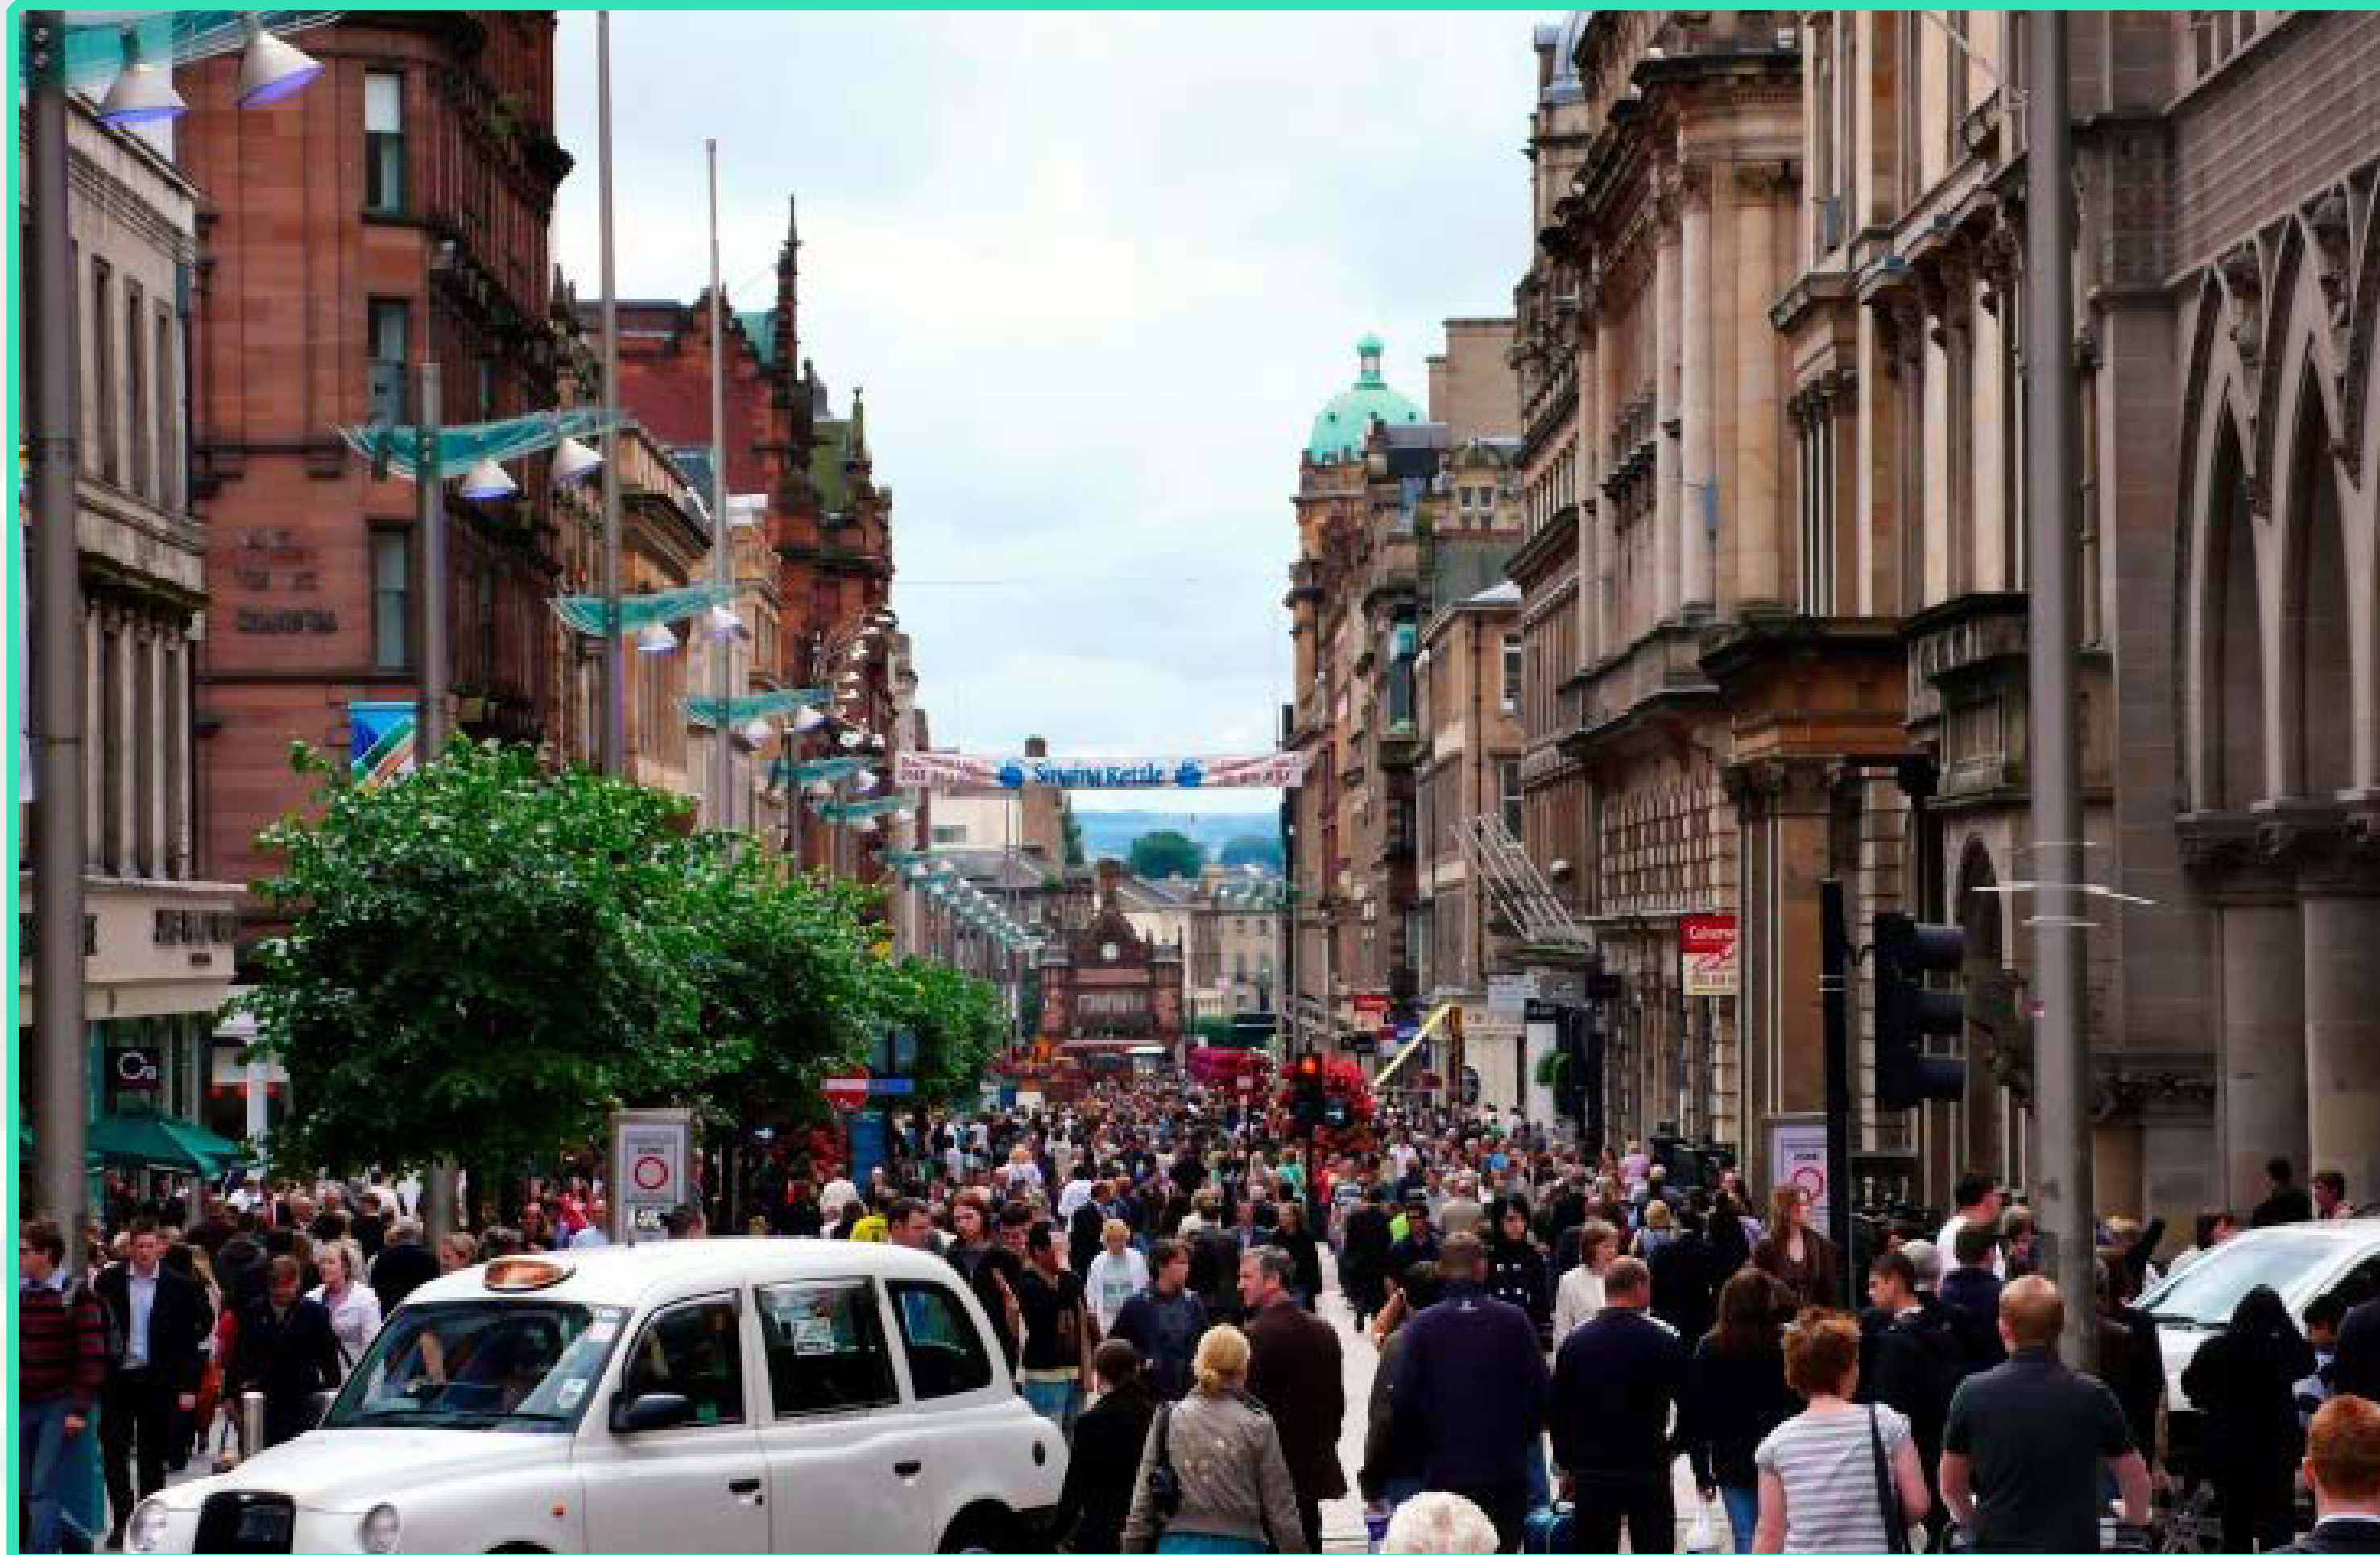

Physical geography looks at the physical structure and workings of the natural world, including mountains, seas, oceans, rivers, continents, landforms, glaciers, weather and climates.

BACK

NEXT

Human geography explores the people, communities and cultures of the world. This includes looking at different types of settlements, economics, populations, health, life expectancy and other ways in which human activity impacts the world.

BACK

NEXT

If we were going to research the human geography of South America, what questions could we ask?

BACK

NEXT

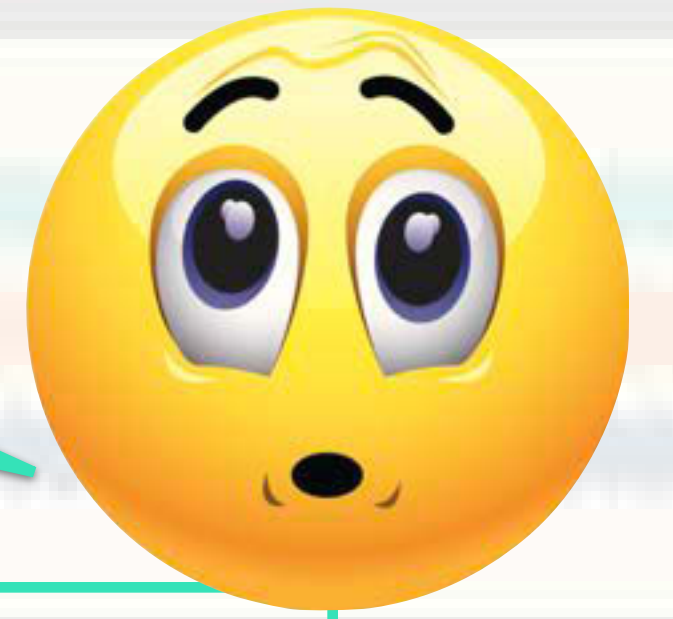

What ideas did you come up with?

BACK

NEXT

Did you think of these questions?

What are the tallest buildings?

What languages are spoken and why?

What is the average life expectancy?

What are the biggest capital cities?

What are the main religions?

What is the population of South America?

How do people earn a living?

Which country has the biggest and the smallest populations?

BACK

NEXT

Have a look at the Population Sheet and a map of South America. Use what you already know about South America to estimate which population goes with which country!
